1 Introduction

This report accompanies the Comparative Study of Electoral Systems Post-Election Survey 2017 (doi:10.11587/GDBBPJ) conducted by the *Austrian National Election Study* (AUTNES) and provides a detailed documentation of the data collection.

The survey's questionnaire is based on the *Comparative Study of Electoral Systems* (CSES) Module 5 and focuses on the Austrian National Parliamentary Election held on 15 October 2017.[1] The questionnaire was extended by country-specific and other relevant questions which are covered in this version (AUTNES Edition).

1.1 How to cite these data

Data users are kindly asked to acknowledge the data and the accompanying release document (Documentation). Please refer to the Austrian Social Science Data Archive - AUSSDA for a recommendation on how to cite these data.

1.2 Changes in Editions

(No changes.)

2 Conditions of Use

2.1 Restrictions

The data are available for non-profit use without restrictions.

2.2 Confidentiality

The AUTNES, its Principal Investigators, and the funding institutions neither take responsibility for the use of the data or interpretations and inferences based on their use, nor do they accept liability for indirect, consequential, or incidental damages or losses arising from use of the data.

2.3 Deposit Requirement

In order to facilitate exchange within the scientific community and to provide the funding agencies with essential information about the use of archival resources, users of the AUTNES data are asked to notify the AUTNES team of publications based on its data.

3 Study Description

3.1 Title and Edition

AUTNES Comparative Study of Electoral Systems Post-Election Survey 2017 – Documentation (AUTNES Edition)

3.2 Principal Investigators

Wolfgang C. Müller, Department of Government, University of Vienna (Supply Side)

Sylvia Kritzinger, Department of Government, University of Vienna (Demand Side)

Hajo Boomgaarden, Department of Communication, University of Vienna (Media Side)

3.6 Topics / Keywords

Comparative Study of Electoral Systems (CSES), politics, voting, elections, Austria

4 Study Design

4.1 Sampling

The population universe comprises eligible voters for the Austrian Parliamentary Election on 15 October 2017 (Austrian citizens, aged 16 years and older at election day).

In total, n = 1203 interviews were successfully completed. Excluding non-eligible cases, this results in a response rate of 43.3%.

Table 1: Sample size and response rate

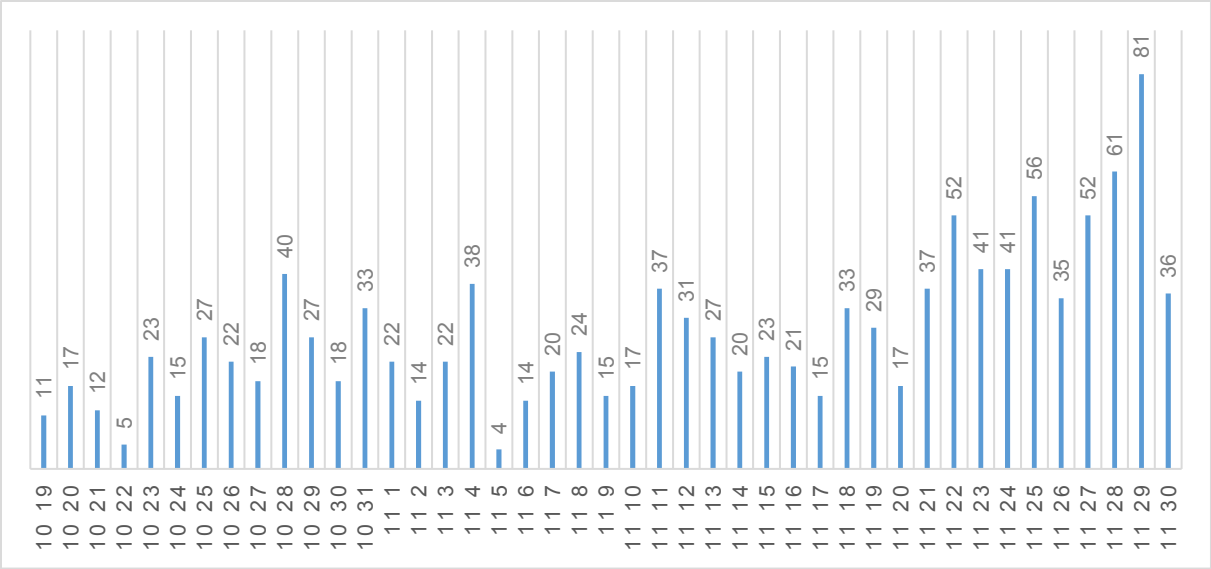
	total	in %
Initial gross sample	**3600**	**100.0**
Incorrect/Non-working number (RDD)	702	19.5
Non-target person	119	3.3
Initial net sample	**2779**	**100.0**
Respondent never available	954	34.3
Refusal	622	22.4
Successful interviews (response rate)	**1203**	**43.3**

4.2 Fieldwork

The survey was administered by means of computer-assisted telephone interviewing (CATI). Of the final sample (n = 1203) 49.0% were reached via mobile phone and 51.0% via landline.

The survey was designed as a cross-sectional sample. The fieldwork took place between 19 October and 30 November 2017 (43 days in total, see Figure 1).

Figure 1: Number of interviews conducted per day (format: month/day)



In total, 22 interviewers (12 female, 10 male) conducted the survey who administered between 1 and 200 interviews (see Table 2).

Table 2: Interviewer workload

ID	No. of interviews
98	1
111	1
10	9
12	12
43	20
9	21
62	21
61	22
3	24
51	25
65	28
377	30
52	33
54	33
37	34
63	35
399	53
13	117
19	131
11	155
315	198
211	200
Total	**1203**

5 Data Cleaning

5.1 Data Protection

Any information on the respondents' residence, such as postal codes (question "D18"), had to be removed for reasons of data protection. Other variables that needed to be deleted in the Open Access version of the data set include the regional constituency variable "regwk", the religious denomination variable "d10", the region of residence variable "d17"and the ISCO variable "d07". The variables month of birth "d01a" and year of birth "d01b" were recoded into an age variable "age" which measures age in 10-year steps. The education variable "d03" was recoded into 3 categories, the country of birth "d14" was recoded into a dichotomous variable. Household size "d20" was recoded into a variable with 6 categories (see section 7 "Variable List" below).

5.2 Variable format and missing values

All missing values were coded according to the questionnaire. In general, missing values are coded as follows:

- Don't know party/person or invalid/ineligible= 66
- Refused = 77
- Don't know = 88

6 Weighting of data

Weights are calculated for post-stratification adjustment according to known population distributions (listed in Table 3) and were provided by the survey institute (IPR). The weighting variable combines demographic and political criteria (i.e., vote recall for the 2017 election). We provide:

- An original or rough weight: "gew_roh"
- A trimmed (winsorized) weight: "gew"

The values of the rough weighting variable ranges between Min = 0.12 and Max= 9.97, the latter weighting variable limits the values to Min ≈ 0.4 and Max ≈ 2.5.

Table 3. Comparison of key characteristics in the sample and population

Variable	**Sample**	**Population**
GENDER (=d02)		
Male	49.6%	48.9%
Female	50.4%	51.1%
AGE rough (=d01a & d01b recoded)		
Aged 16-45	40.6%	41.6%
Older than 45	59.4%	58.4%
AGE detailed (=d01a & d01b recoded)		
16-19	3.1%	5.0%
20-29	14.2%	14.1%
30-39	13.7%	13.9%
40-49	17.3%	16.9%
50-59	20.6%	18.7%
60-69	16.0%	13.6%
70+	15.1%	17.7%
AGE X EDUCATION		
Aged 16-45 w/Matura	23.9%	15.7%
Aged 16-45, no Matura	16.7%	25.9%
Older than 45 w/Matura	21.2%	12.5%
Older than 45, no Matura	38.2%	45.9%
GENDER X EDUCATION		
Female w/Matura	22.7%	14.7%
Female, no Matura	27.7%	36.4%
Male w/Matura	22.4%	13.5%
Male, no Matura	27.3%	35.4%
REGION (=d17)		
Burgenland	3.0%	3.7%
Carinthia	7.2%	6.9%
Lower Austria	20.5%	20.2%
Upper Austria	13.5%	17.3%
Salzburg	5.9%	6.1%
Styria	13.3%	15.2%
Tyrol	6.9%	8.5%
Vorarlberg	4.8%	4.2%
Vienna	24.9%	18.0%
HOUSEHOLD SIZE (=d20 recoded)		
1 person	21.9%	20.2%
2 persons	35.6%	32.1%
3 or more persons	41.1%	47.7%
refused	1.4%	--
EDUCATION (=d03 recoded)		
No school, primary school, lower secondary level (incl. Pre-vocational school)	14.2%	21.4%
Vocational training/school	26.8%	37.0%
Higher vocational school (BMS)	14.0%	13.5%
Secondary school leaving certificate (“Matura”)	27.6%	15.4%
Tertiary education	17.5%	12.8%
EMPLOYMENT (=D06)		
Working (Codes 1-3)	60.6%	52.5%
Retired (Code 7)	27.1%	28.7%
Pupil, Student (Code 6, excl. in vocational training)	6.3%	7.1%
Other (other Codes)	6.0%	11.7%
VOTE RECALL 2017 incl. non-voters as category (=q12a & q12b)		
Non-Voter	6.3%	20.0%
SPÖ	22.9%	21.3%
ÖVP	33.3%	24.9%
FPÖ	18.0%	20.6%
The Greens	4.2%	3.0%
NEOS	4.4%	4.2%
List Pilz	5.6%	3.5%
Other/invalid	5.3%	2.5%
