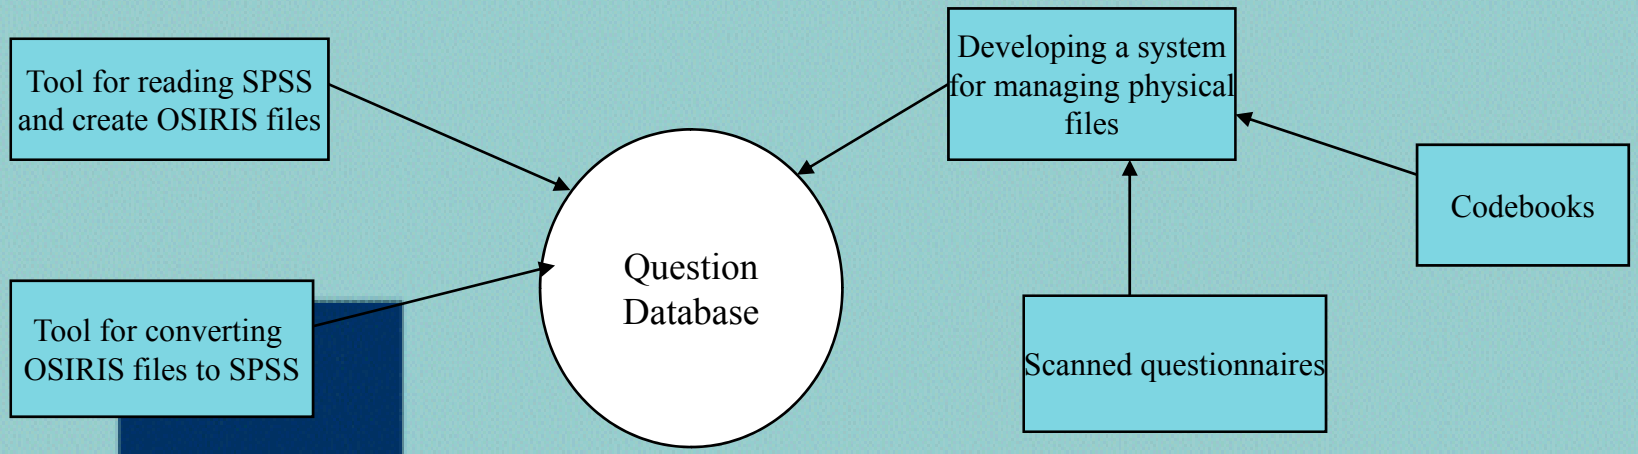
Present tools



What’s in it for me?

The end user

- Additional methods for identifying surveys
- New possibilities for comparative research
- Support in the construction of new questionnaires and questions
- New possibility for generating time series
- Longitudinal analysis of a question
- Research on the question formulations
- More open access and insight into the surveys
- ……and much more

What’s in it for me?

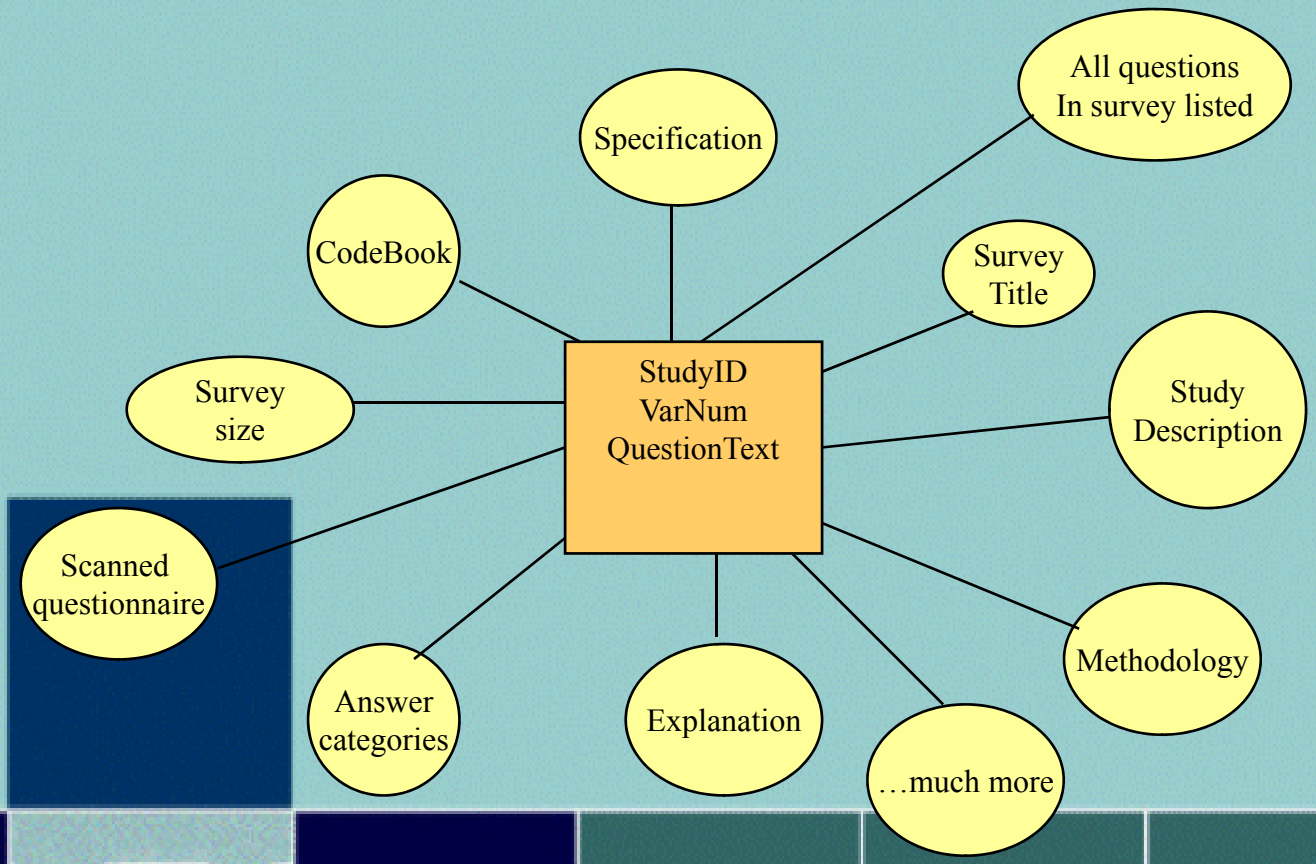
The data provider

- Improvement of the data service
- Reduces service costs

Expectations:

- Increase the visibility of the data archive
- Increase the use of the data materials
- Improve the acquisition process

A world of information



With a click

- Intuitive search interface
- Possible options in the interface:
  - Precision in search criteria
  - Amount of information in search result
    - Possibility for adding opted out information
  - Selection of survey type
  - Selection of population size in survey
  - Methodology used in survey
  - ???

How will it all be achieved?

- Extract question text from OSIRIS files
  Simple question:

```
Q00240024 Qst. 12: Has the consideration to the economy of the municipalities influenced
K0024     your position to the question of a union of municipalities
K0024     to a large degree, to some extent, to a very small extent
K0024     or not at all?
C0024      2621. To a large degree
C0024      2322. To some extent
C0024      1233. To a very small extent
C0024      5504. Not at all
C0024       505. Don't know
```

- Open question:

Q00420042 Qst. 23: How many years have you stayed on this island?
K0042 Number of years:
X0042 The variable is coded in the interval 1 - 93.
K0042 01 = 1 year or less
K0042 99 = Don’t remember

- Multiple response question:
