1. Introduction

The Documentation of the Austrian National Election Study (AUTNES) Comparative Study of Electoral Systems Post Election Survey 2013 accompanies the data files and provides useful information about the data, coding and any related issues.

The Austrian National Parliamentary Elections were held on 29 September 2013.

1.1 How to cite these data

Data users are kindly asked to acknowledge the data ***and*** the accompanying release document. Please refer to the GESIS data catalogue (www.gesis.org) for a recommendation on how to cite the data and the documentation.

1.2 Changes in Edition 2.0.0

For an overview of changes between the first version of this data (Edition 1.0.0; 2014) and the current version 2.0.0, please look at the document "ZA5856_changes_in_v2-0-0.pdf" available on the GESIS website.

2. Conditions of Use

2.1 Restrictions

The data are available for non-profit use without any restrictions.

2.2 Confidentiality

AUTNES, the Principal Investigators and the funding institutions are neither responsible for the use of the data or for interpretations or inferences based on their use, nor do they accept liability for indirect, consequential or incidental damages or losses arising from use of the data.

2.3 Deposit Requirement

In order to facilitate exchange within the scientific community and to provide the funding agencies with the essential information about the use of the archival resources, users of the AUTNES data are requested to notify the AUTNES team of all forms of publications based on the AUTNES data.

3. Study Description

3.1 Title

The Comparative Study of Electoral Systems Post-Election Survey 2013.

3.2 Principal Investigators

Wolfgang C. Müller, University of Vienna (AUTNES Supply Side)

Sylvia Kritzinger, University of Vienna (AUTNES Demand Side)

Klaus Schönbach, University of Vienna (AUTNES Media Side)

3.3 Funding / Acknowledgments

The survey was carried out under the auspices of the Austrian National Election Study (AUTNES) and the National Research Network (NFN). It was sponsored by the Austrian Research Fund (FWF) (S10902-G11). FWF Austrian Science Fund.

3.4 Fieldwork

Jaksch & Partner

Schillerstraße 8

4020 Linz

Austria

Email: office@jaksch-partner.at

http://www.jaksch-partner.at/

3.5 File Name

The AUTNES provides a German and an English version of the data as well as two different formats. A SPSS readable data file (.sav), and a Stata format (.dta).

ZA5856_de_v2-0-0.sav
ZA5856_en_v2-0-0.sav
ZA5856_de_v2-0-0.dat
ZA5856_en_v2-0-0.dat

3.6 Keywords

Distributional politics and social protection, mobilization, political knowledge

4. Study Design

4.1 Fieldwork

Fieldwork was carried out by the field institute Jaksch & Partner between 1 October 2013 and 29 October 2013 using Computer Assisted Telephone Interviewing (CATI). In total, 1000 interviews were completed.

4.2 Sampling Procedure

The sampling method employed was stratified random sampling. The stratification characteristics were the nine Austrian provinces ("Bundesländer"). Within the Austrian provinces an unlimited random sample was drawn and respondents were sampled proportional to the population size. Phone numbers were randomly selected using a dual sampling frame (Random Digit Dialling: 89.1% and Randomised Last Digits: 10.9%).

Within each household, the last-birthday method was used to randomly select the respondent. The last birthday method is a quick and easy method of selecting respondents within a sampled household in random-digit dialling surveys. It asks for the eligible person within the sampling unit who had the most recent birthday.

The sample is representative of the eligible Austrian voters. These are citizens aged 16 and older. Please see also Section 4.5.

4.3 Quality control

In order to ensure the quality of the data, several quality checks were conducted throughout the data gathering process: 1) Quality control of the questionnaire 2) interviewer training, 3) quality control during the field period, 4) post-field work interview verification, and 5) data cleaning.

(1) Quality control of the questionnaire was conducted by trained members of staff at Jaksch & Parter with regard to the completeness, plausibility, and formal correctness of the questionnaire.

(2) Prior to the interviewing process, a training session for the interviewers was held at the field institute under the supervision of senior researchers at Jaksch & Partner as well as a member of the AUTNES team. The training included:

- Intensive interviewer briefing by the project leader at Jaksch & Partner
- Presentation and practice of the questionnaire
- Group as well as individual exercises
- Observation and control by the senior researchers

The senior investigators at Jaksch & Partner as well as an AUTNES team member were available to answer questions about any component of the survey throughout the training session.

(3) During the field period, respondents were contacted up to five times until a non-sample was declared. In addition, several techniques were employed to persuade those respondents who indicated at first contact that they were undecided whether or not they wanted to participate. For instance, the household was passed on to a more experienced interviewer and they re-contacted the household up to three times in order to persuade them to participate in the survey. Individual interviews and interviewer feedback were recorded for quality control in the call centre. Jaksch & Partner also established a daily quality control process of the field work by the project leader.

(4) After the interview, some respondents were re-contacted by Jaksch & Partner in order to verify the data and assess their quality. In total, 10% of the interviews were evaluated and respondents asked about their personal interview situation.

(5) Team members at Jaksch & Partner also did the data cleaning, which included checking the completeness, plausibility and consistency of the data. If applicable, missing or incorrect information were re-collected or corrected. The data cleaning was conducted manually as well as computer assisted. In addition, members of the AUTNES team double checked for duplicates, removed typographical errors as well as validated and corrected values against a known list of entries, whenever possible. The latter predominantly applied to contextual data that could be inferred from the postal code.

4.4 Response Rate

The response rate for the CSES post-election survey is 52.1%. Please see Table 1 for a detailed account.

Table 1: Response Rate

	Number of Cases	Total % of the overall sample	Total % of the net sample
No response after 5 contact attempts/non-contact	4238	28.2%	
No contact/incorrect number	6721	44.8%	
No private household	1765	11.8%	
Housing units with no eligible respondents	356	2.4%	
Completed interviews	1000		52.1%
Interrupted interviews	0		0.0%
Target respondent identified, but refused	739		38.5%
Target respondent identified, but unable to participate	78		4.1%
Target respondent identified, but language problems	84		4.4%
Other reasons for non-response	19		1.0%
Total	15000		100.0%

4.5 Post Stratification Weight

The dataset includes a post-stratification weight (gew). The weight variables were computed on the basis of the following socio-demographic characteristics:

- Gender
- Age
- Education
- Household size
- Provinces ('Bundesländer')
- Employment status

The weight's values range from a minimum of 0.51 to a maximum value of 3.57. The target distributions are based on StatCube Micro Census data 2012 (Statistics Austria, StatCube, last accessed in September 2013). StatCube data refers to all Austrian citizens aged ≥ 15, a total of 6325600 residents. Table 2 displays the actual estimates of the total Austrian target population as well as the weighted values in the sample:

Table 2: Expected Socio-Demographic Characteristics and Weighted Values

Socio-Demographics		Expected values	Values after weighting
Gender	male	48.6%	48.4%
	female	51.4%	51.6%
Age	15 to 17 years old	4.3%	3.8%
	18 to 21 years old	5.7%	5.2%
	22 to 24 years old	4.3%	4.1%
	25 to 34 years old	13.8%	14.2%
	35 to 44 years old	17.2%	17.7%
	45 to 54 years old	19.1%	19.2%
	55 to 64 years old	14.1%	14.7%
	65+ years old	21.6%	21.0%
Education	no school/primary school/lower secondary level	24.5%	23.9%
	vocational training/vocational school	36.6%	36.3%
	higher vocational school (BMS)	13.8%	13.4%
	secondary school leaving certificate (=Matura)	14.4%	15.0%
	university-related institution/tertiary education	10.7%	11.3%
Household size	single person household	19.2%	19.8%
	2 person household	29.5%	30.2%
	3 person household	20.5%	19.9%
	4+ person household	30.8%	30.1%
Provinces ('Bundesländer')	Burgenland	3.6%	3.4%
	Carinthia	7.0%	7.2%
	Lower Austria	19.9%	19.4%
	Upper Austria	17.2%	17.7%
	Salzburg	6.2%	6.8%
	Styria	15.3%	14.7%
	Tyrol	8.3%	8.4 %
	Vorarlberg	4.2%	4.8%
	Vienna	18.2%	17.5%

Employment status	employed	53.3%	54.0%
	military or civilian service	0.4%	0.0%
	maternity leave	1.5%	1.8%
	unemployed	3.0%	2.9%
	retired	27.2%	27.9%
	permanently incapable of employment/disabled	1.4%	0.8%
	housewife/househusband	5.6%	5.4%
	pupils/students	7.1%	6.8%
	other	0.5%	0.4%
Gender x education	female x no school/primary school/lower secondary level	63.4%	63.1%
	female x vocational training/vocational school	37.2%	38.2%
	female x higher vocational school (BMS)	68.5%	67.9%
	female x matura	51.4%	51.6%
	female x tertiary education	51.0%	51.2%
	male x no school/primary school/lower secondary level	36.6%	36.9%
	male x vocational training/vocational school	62.8%	61.8%
	male x higher vocational school (BMS)	31.5%	32.1%
	male x matura	48.6%	48.4%
	male x tertiary education	49.0%	48.8%
Gender x age	female x 15 to 17 years old	48.6%	46.7%
	female x 18 to 21 years old	48.6%	48.3%
	female x 22 to 24 years old	48.6%	49.4%
	female x 25 to 34 years old	40.0%	48.3%
	female x 35 to 44 years old	49.7%	49.9%
	female x 45 to 54 years old	49.7%	51.3%
	female x 55 to 64 years old	51.8%	51.9%
	female x 65+ years old	57.6%	57.3%
	male x 15 to 17 years old	51.4%	53.3%
	male x 18 to 21 years old	51.4%	51.7%
	male x 22 to 24 years old	51.4%	50.6%
	male x 25 to 34 years old	51.0%	51.7%
	male x 35 to 44 years old	50.3%	50.1%
	male x 45 to 54 years old	50.3%	48.7%
	male x 55 to 64 years old	48.2%	48.1%
	male x 65+ years old	42.4%	42.7%

(Source: Micro Census data 2012, Statistics Austria, StatCube, last accesseed September 2013)

5. Questionnaire

5.1 Questionnaire Development and Quality Assessment

The CSES questionnaire was run as an independent survey module and most of the items on the original CSES questionnaire were adopted without any changes. A few questions deviated from the original question wording provided by the CSES. The reasons for this are related to translation issues as well as to knowledge gained from pre-testing. With regard to the former, some questions did not easily translate into German, which is why a very similar question wording was chosen that nevertheless deviates from the original question wording provided by the CSES. With regard to the latter, while no exclusive pre-tests were run for the CSES module, the AUTNES research team pre-tested a larger number of survey questions within the framework of other surveys that were run by the AUTNES. Any amendments were reviewed and evaluated thoroughly by the members of the AUTNES research team through cognitive and quantitative pre-testing. The AUTNES team opted for the question wording that showed to be more precise and to capture the concept intended to be measured better than the original question provided. Please note that these cases are an exception and that the AUTNES tried to implement the CSES module 1:1 whenever possible in order to ensure the quality of the CSES data and to guarantee the comparability of the data with other countries. Some questions were dropped from the original CSES questionnaire as they were not applicable to the Austrian context. Please see Section 5.3 for a more detailed account of the amendments undertaken by the AUTNES.

5.2 Language

The CSES survey was conducted in German. Members of the AUTNES team translated the original CSES questionnaire from English into German. A back-translation was conducted as well to pick up on any translation mistakes and deviations from the original CSES questionnaire as well as to assess the quality of the translation. Please see Section 5.3 for possible language-related amendments to the original questionnaire.

5.3 Deviation Notes

This section records which questions were amended, added to or dropped from the original CSES questionnaire. Additional quality checks are indicated by a star (*) when quantitative pre-testing took place and two stars (**) when cognitive pre-testing was conducted.

5.3.1 Additional Questions

The AUTNES Team added some additional questions of interest to the original questionnaire, which integrated nicely into the modules theme. Note that 'don't know' and 'refused' answers are not recorded in the table below, but they are indicated by the values 88 (=don't know) and 99 (=refused).

Table 3: Additional questions

Variable Name	Label	Question wording and coding
q1*	Austrian citizenship	Are you an Austrian citizen? 1. Yes 2. No
q9	Changes in the economic situation in the region (in comparison to Austria)	And if you now think about your region: How would you assess the state of economy in your region compared to other parts of Austria? Has the state of the economy in your region compared to the rest of Austria...? [Region refers to the respondent's own political district as well as bordering political districts – those districts, in which most people predominately stay.] 1. got better 2. stayed the same 3. got worse
q10	Changes in the economic situation in the region (in comparison to Austria): better	What would you say: Much better or somewhat better? 1. Much better 2. somewhat better
q11	Changes in the economic situation in the region (in comparison to Austria): worse	What would you say: Much worse or somewhat worse? 1. Much better 2. somewhat better
q19	Current election – Vote Choice if R had voted	Assuming you had voted in the elections, which party would you have most likely voted for? 1. SPÖ 2. ÖVP 3. FPÖ 4. FP Kärnten 5. BZÖ 6. Greens 7. KPÖ 8. NEOS 9. Team Stronach 10. Pirates 11. Other Party 12. Cast an invalid ballot

Variable Name	Label	Question wording and coding
q35	Contact in person: Which party?	And which party contacted you personally in a direct conversation? 1. SPÖ 2. ÖVP 3. FPÖ 4. FP Kärnten 5. BZÖ 6. Greens 7. KPÖ 8. NEOS 9. Team Stronach 10. Pirates 11. Other Party 12. No party/nobody
q37	Contact by phone: Which party?	And which party contacted you by phone? 1. SPÖ 2. ÖVP 3. FPÖ 4. FP Kärnten 5. BZÖ 6. Greens 7. KPÖ 8. NEOS 9. Team Stronach 10. Pirates 11. Other Party 12. No party/nobody
q39	Contact by text message: Which party?	And which party contacted you by text message? 1. SPÖ 2. ÖVP 3. FPÖ 4. FP Kärnten 5. BZÖ 6. Greens 7. KPÖ 8. NEOS 9. Team Stronach 10. Pirates 11. Other Party 12. No party/nobody

Variable Name	Label	Question wording and coding
q44	Campaign: TV ads	Did you watch campaign advertisements on TV? 1. yes 2 no
q45	Campaign: TV ads: Which party?	And of which party did you watch the campaign advertisements on TV? 1. SPÖ 2. ÖVP 3. FPÖ 4. FP Kärnten 5. BZÖ 6. Greens 7. KPÖ 8. NEOS 9. Team Stronach 10. Pirates 11. Other Party 12. No party/nobody
q46**	Mobilization R. - family	During the election campaign, did you try to persuade any member of your close family to vote for a particular political party? 1. yes 2. no 77. not applicable
q47**	Mobilization R. - friends	And what about your close friends? 1. yes 2. no 77. not applicable
q48**	Mobilization R. – work/school	And work colleagues or peers at university or school? 1. yes 2. no 77. not applicable
q49**	Mobilization R. - neighbours	And neighbours? 1. yes 2. no 77. not applicable

Variable Name	Label	Question wording and coding
q63**	Leader attributes - competence	Next, we will talk about the traits of some candidates in more detail. If I mention a politician who you do not have an opinion about, please tell me. Let's begin with competence, that is, whether a politician knows about factual issues. What do you think: Are the following politicians very, fairly, a little bit or not at all competent? Item 1: Werner Faymann Item 2: Michael Spindelegger Item 3: Heinz Christian Strache Item 4: Josef Bucher Item 5: Eva Glawischnig Item 5: Frank Stronach Item 7: Matthias Strolz 1. very competent 2. somewhat competent 3. a little competent 4. not at all competent
q64**	Leader attributes - honesty	Now about honesty, that is, whether or not a politician is an honest person. What do you think: are the following politicians very, fairly, a little bit or not at all honest? Item 1: Werner Faymann Item 2: Michael Spindelegger Item 3: Heinz Christian Strache Item 4: Josef Bucher Item 5: Eva Glawischnig Item 5: Frank Stronach Item 7: Matthias Strolz 1. very honest 2. somewhat honest 3. a little bit honest 4. not at all honest

Variable Name	Label	Question wording and coding
q65**	Leader attributes - assertiveness	Now about the candidates' assertiveness, that is, whether a politician can translate their ideas into policy. What do you think, how assertive are the following politicians - are they very, fairly, a little bit, or not at all assertive? Item 1: Werner Faymann Item 2: Michael Spindelegger Item 3: Heinz Christian Strache Item 4: Josef Bucher Item 5: Eva Glawischnig Item 5: Frank Stronach Item 7: Matthias Strolz 1. very assertive 2. somewhat assertive 3. a little bit assertive 4. not at all assertive
q66**	Leader attributes - charisma	And now to the subject of charisma, that is, the impression politicians make on the public. What do you think, are the following politicians very, fairly, a little bit or not at all charismatic? Item 1: Werner Faymann Item 2: Michael Spindelegger Item 3: Heinz Christian Strache Item 4: Josef Bucher Item 5: Eva Glawischnig Item 5: Frank Stronach Item 7: Matthias Strolz 1. very charismatic 2. fairly charisma 3. a little bit charismatic 4. not at all charismatic

Variable Name	Label	Question wording and coding
Q67**	ICT A	I will now read out 4 activities that some people have already done, but others have not. Please tell me, HOW MANY of these activities you have done over the past 3 years, don't tell me which ones, but only how many: - Wrote an editorial letter - Was an active member in a club/ society - Changed the main place of residence - Donated money [RECORD NUMBER 0 to 4]
Q68**	ICT B	I will now read out 4 activities that some people have already done, but others have not. Please tell me, HOW MANY of these activities you have done over the past 3 years, don't tell me which ones, but only how many: - Wrote an editorial letter - Was an active member in a club/ society - Voted in the national parliamentary election in September 2013 - Changed the main place of residence - Donated money [RECORD NUMBER 0 to 5]
q75	Ownership of apartment rented by someone else	Do you or a member of your household own an apartment or house that is rented by somebody else? 1. yes 2. no
q82	Filter for current employment status	Are you currently employed or seeking work? 1. yes 2. no

Variable Name	Label	Question wording and coding
q88*	Current employment status – not in labour force	What best describes your situation? 1. retired 2. in education: school 3. in education: higher education 4. in education: other 5. maternity leave or others 6. housewife/husband 7. military or civil service 8. unfit to work 9. unemployed or looking for work 10. other
q89*	If R was ever employed, no matter if fulltime or part time	Were you **previously** employed; no matter if that was full-time or part-time? 1. fulltime or part time 2. neither nor
q90*	Socio economic status in **last** job	And what was your **last** occupation? 1. white collar 2. worker 3. public sector/official 4. public sector / contract worker 5. self-employed (without employees) 6. self-employed (with employees) 7. independent contractor 8. farmer
q91	Main occupation in **last** job	And what job did you have?
q92	Industrial sector in **last** job	Did you work in agriculture or forestry, in an industrial enterprise, or in the service and public administration sector? 1. agriculture and forestry 2. industrial enterprise 3. service and public administration 4. other
q93	Filter for partner's current employment status	Is your partner currently employed or seeking work? 1. yes 2. no

Variable Name	Label	Question wording and coding
q99	Current employment status – spouse/partner not in labour force	What best describes their situation? 1. retired 2. in education: school 3. in education: higher education 4. in education: other 5. maternity leave or others 6. housewife/househusband 7. military or civil service 8. unfit to work 9. unemployed or looking for work 10. other
q100	If spouse/ partner were employed previously, no matter if fulltime or part time	Were they previously employed; no matter if that was full-time or part-time? 1. fulltime or part time 2. neither nor
q101	Socio economic status spouse/partner in **last** job	And what was their **last** occupation? 1. white collar 2. worker 3. public sector / official 4. public sector / contract worker 5. self-employed (without employees) 6. self-employed (with employees) 7. independent contractor 8. farmer
q102	Main occupation spouse/partner in **last** job	And what was the last job they had?
q103	Previous Industrial sector spouse/partner in last job	Did they work in agriculture or forestry, in an industrial enterprise, or in the service and public administration sector? 1. agriculture and forestry 2. industrial enterprise 3. service and public administration 4. other

Variable Name	Label	Question wording and coding
q109*	Filter for language usually spoken at home	Do you usually speak a language other than German at home? (if q69>1) Do you usually speak a language other than German with your family? (if q69 =1) 1. yes 2. no
q115	How long lived in community?	And how many years have you approximately lived in this residential area?
q107*	Filter for religious denomination	Do you belong to a religious group? 1. yes 2. no
q118	Type of phone connection	Finally, we have a few technical questions. Did we reach you on your mobile phone or on your landline? 1. mobile phone 2. landline
q119	If mobile phone in q118	And where did we reach you? 1. at home 2. at work/at school/apprenticeship 3. out (alone) 4. out (with others) 5. other
q120	If mobile phone in q118	Do you have a landline at home? 1. yes 2. no
q121	If mobile phone in q118	Do you use another mobile phone? 1. yes 2. no
q122	If landline in q118	Do you also have one or more mobile phones? 1. yes 2. no
q123	Interviewer number	String
q124*	R.'s command of German (evaluated by Interviewer)	How would you evaluate the respondent's command of German on a scale from 0 to 10, where 0 means "very bad" and 10 means "very good"?
q125	Telephone book or RDD	Number from telephone book or RDD? 1. telephone book 2. RDD

5.3.2 Amended Questions

Some of the original questions were amended due to translation issues or as a result of pre-testing. The question wording showed to be better suited was chosen instead of the original question wording. Thereby, it was ensured that the questions are comparable with the other country data in the CSES Module or easily recodeable into a matching format. Additional quality checks are indicated by a star (*) when quantitative pre-testing took place and two stars (**) when cognitive pre-testing was conducted. Note that 'don't know' and 'refused' answers are not recorded in the table below, but they are indicated by the values 88 (=don't know) and 99 (=refused).

Table 3: Amended Questions

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
Q5LH-a	q16* **	Current LH election – cast a ballot	Different question wording: In the federal election on 29 September 2013, a lot of people could not vote or chose not to vote for good reasons. Which of the following statements best describes you? 1. I did not vote in the federal election on 29 September 2013 2. I thought about voting this time but didn't 3. I usually vote but didn't this time 4. I am sure I voted in the federal election on 29 September 2013 5. [VOLUNTEERED] I voted by absentee ballot	The question format was pre-tested and it was shown that it better measured actual turnout and reduced social desirability bias.[1] It is also easily recordable into the original CSES variable and thus does not harm the cross-sectional comparability of the CSES data.

[1] Zeglovits, E. & S. Kritzinger (2013) New Attempts to Reduce Overreporting of Voter Turnout and Their Effects. *International Journal of Public Opinion Research*: doi: 10.1093/ijpor/edt010.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
Q6a	Q20* **	Previous LH election – cast a ballot	Different question wording: This question is about the federal election of September 2008. In this election, a lot of people could not vote or chose not to vote for good reasons. This election is some time ago now. Which of the following statements describes you best? 1. I am sure I did not vote in the federal election in September 2008 2. I am not sure if I voted but I think it is more likely that I did not 3. I am not sure if I voted but I think it is more likely that I did 4. I am sure that I voted in the federal election in September 2008	See above, the question wording is better suited to measuring actual turnout.
Q17f	q42	Mobilization: Institutional contact social network and web	Different question wording: Through the internet, in a social Network like Facebook or Twitter? 1. yes 2. no	A short cut was used as a long battery of questions on other ways of mobilisation was asked prior to this question.
Q17g	q43	Mobilization: Institutional contact - who	Different question wording: And which party did contact you by mail, email, or through the internet and social networks? 1. SPÖ 2. ÖVP 3. FPÖ 4. FP Kärnten 5. BZÖ 6. Greens 7. KPÖ 8. NEOS 9. Team Stronach 10. Pirates 11. Other Party 12. No party/nobody	Here a longer version was used to emphasise that it aims at parties who contacted the respondent by mail, email or online, but not by any other means.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
Q20a	q58	Political Information 1	The next few questions are a quiz about Austrian politics. We are interested in recording the current level of information of the public. If you are uncertain about a question, please say it. We will then continue with the next question. Which of the following persons was Finance Minister **before** the national parliamentary election? Josef Pröll, Johanna Mikl-Leitner, Maria Fekter oder Rudolf Hundstorfer?	A short introduction was added to avoid that respondents feel like they are in a test situation.
Q20b	q59	Political Information 2	Different calculation of the unemployment rate: September 2013: 1. 2.9% 2. 6.9% 3. 8.9% 4. 9.9%	The unemployment rate used for this item is the unemployment rate by national calculation since this number is reported more often in the media. Because we wanted to avoid confusion with the EUROSTAT calculation, we changed the categories into [UR – 4%], [UR], [UR+2%], [UR+3%].
Q20d	q61	Political Information 4	One name was replaced. 1. Kofi Annan 2. Javier Perez de Cuellar 3. Ban Ki-Moon 4. Boutros Boutros-Ghali	Kurt Waldheim was replaced by Javier Perez de Cuellar as Waldheim is a former Austrian president, who died a few years ago. It thus seemed sensible to replace the name as most Austrians are likely to know that Waldheim is an incorrect answer.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
Q22a	q72	Ownership: residence 1	Question Q22a split in two questions Owning an apartment or house?	In Austria a larger proportion of people owns a small second home such as a holiday flat. This is why the original question provided by the CSES was split into two separate questions in order to avoid bias.
Q22a	q73	Ownership: residence 2	Question Q22a split in two questions Owning a weekend home?	In Austria a larger proportion of people owns a small second home such as a holiday flat, this is why the original question provided by the CSES was split into two separate questions in order to avoid bias.
Q22b	q74	Ownership: business, property, farm, livestock	Livestock was excluded from this question	It did not seem relevant in the Austrian context to include this. Whenever someone answered that they owned a farm this included livestock to some extent.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
D3	q78*	Education	Answer categories were adapted to Austrian educational system Survey categories correspond to ISCED categories as follows: 1 did not go to school 2 did not finish school 3 Elementary school or lower (ISCED 1) 4 Modern secondary school or general secondary school lower grad 4 (ISCED 2) 5 Special school (ISCED 2) 6 Polytechnic school, vocational middle school (ISCED 3) 7 Apprenticeship, vocational school (ISCED 3) 8 General secondary school with diploma (ISCED 3) 9 Vocational secondary school with diploma (ISCED 4) 10 University related institution (ISCED 5) 11 College (ISCED 5) 12 Bachelor (ISCED 5) 13 Master/Graduated engineer/ University of Applied Science Degree (ISCED 5) 14 Doctorate/ PhD (ISCED 6) 15 Other, namely...	It seemed sensible to amend the highest degree of education to the Austrian context. ISCED Levels are indicated to ensure comparability.
D10	q83*	Current employment status	Some codes were cut: 1. employed fulltime (more than 32 hours/week) 2. employed part time (Between 15 and 32 hours/week) 3. employed less than 15hours/week; 4. helping family member 5. apprenticeship 6. unemployed or looking for work 7. maternity leave or others	It was adjusted to the Austrian context, so codes that were shown to be unimportant were cut.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
D12	q84*	Socio Economic status	Some codes were added: 1. white collar 2. worker 3. public sector / official 4. public sector / contract worker 5. self-employed without employees 6. self-employed with employees 7. independent contractor 8. farmer	The Austrian context has a more differentiated scale of socio-economic status.
D14	q86	Industrial sector	Codes cut: Do you work in agriculture or forestry, in an industrial enterprise, or in the service and public administration sector? 1. agriculture and forestry 2. industrial enterprise 3. service and public administration 4. 0ther	The answering codes were reduced as the original ones were fairly long. It did not change the sense of the question and respondents picked the sectors easily without more information on the codes.
D15	q94	Current employment status – partner/spou-se	Some codes were cut: 1. employed fulltime (more than 32 hours/week) 2. employed part time (Between 15 and 32 hours/week) 3. employed less than 15hours / week; 4. helping family member 5. apprentice 6. unemployed or looking for work 7. maternity leave or other	It was adjusted to the Austrian context, so codes that were shown to be unimportant were cut.
D17	q95	Socio Economic status partner/spou-se	Some codes were added: 1. white collar 2. worker 3. public sector / official 4. public sector / contract worker 5. self-employed without employees 6. self-employed with employees 7. independent contractor 8. farmer	The Austrian context has a more differentiated scale of socio-economic status.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
D19	q97	Industrial sector partner/ spouse	Codes cut down: Do you work in agriculture or forestry, in an industrial enterprise, or in the service and public administration sector? 1. agriculture and forestry 2. industrial enterprise 3. service and public administration 4. 0ther	The answering codes were reduced as the original ones were fairly long. It did not change the sense of the question and respondents picked the sectors easily without more information codes.
D20	q104	Household income	Actual ranges indicated: 1. less than 1.200 Euros 2. 1.200 to 2.000 Euros 3. 2.000 to 2.800 Euros 4. 2.800 to 3.600 Euros 5. more than 3.600 Euro s	Instead of providing quintiles, actual ranges are indicated.
D24	q108*	Religious denomination	Codes amended to the five largest religious groups in Austria: 1. Roman-Catholic 2. Protestant 3. Islam/Muslim 4. Eastern Orthodox Church 5. Jewish 6. other	Amended to the Austrian context.
D25	q110*	Language usually spoken at home	And in which language or languages do you speak?	This was asked as a follow up to a question that was added and captured whether respondent spoke another language than German at home (See Section 5.3.1 q109). Only respondents who mentioned in q109 that they predominantly speak another language than German were asked this question.

CSES Variable Name	AUTNES Variable Name	Label	Differences	Explanation
D26	q113	Region	Question wording deviates: In which region is your main residence? ('Bundesländer') 1. Burgenland 2. Carinthia 3. Lower Austria 4. Upper Austria 5. Salzburg 6. Styria 7. Tyrol 8. Vorarlberg 9. Vienna	It was asked where the respondents' **main** residence is.
D29	q114*	Rural or urban residence	Coding differs: 1. rural area or village 2. small town 3. mid-sized town 4. large town or city 5. suburbs of a large town or city	Another code for small towns was introduced. Note also that the code for "large town or city" and "suburbs of a large town or city" changed.
D31	q116*	Country of birth	List provided: 1. Austria 2. Germany 3. Turkey 4. Serbia 5. Croatia 6. Bosnia and Herzegovina 7. Slovenia 8. Poland 9. Czech Republic 10. Russia 11. Hungary 12. Other	Instead of asking an open-ended question, a list with the most common countries of origin was provided.

5.3.3 Dropped Questions

The following questions were dropped from the Austrian CSES questionnaire as they are not applicable to the Austrian context:

CSES	Label
Q5P1-a	Turnout (president)
Q5P1-b	Vote choice (president)
Q5P2-a	Turnout (president 2nd round)
Q5P2-b	Vote Choice (president 2nd round)
Q5LH-c	Vote Choice (current Lower House election district candidate)
Q6c	Previous election: vote choice – district candidate
Q13a – Q13i	Additional 0-10 scale parties
Q14	Additional 0-10 scale self
D7	Business or employers association membership
D8	Farmers association membership
D9	Professional association membership
D13	Employment type – public or private
D18	Spouse employment type – public or private
D27	Race
D28	Ethnicity
