Introduction

This Documentation Report accompanies and describes the data of the AUTNES manual content analysis of media coverage of the Austrian National Election held on 15 October 2017. The body elected was the National Parliament (Nationalrat).

The Documentation Report is structured in seven sections. The first section outlines the conditions of use of the data. The second section, the study description, provides an overview of the study. The third section presents the study design, i.e. the media sample and the sampling procedure. The fourth section provides information about the coder training and reliability tests. The section Coding summarises the variables and the units of analysis. The sixth section outlines the data cleaning and preparation procedures. The last section provides an overview of the frequencies of all variables in the analysed media outlets. Precise information about the coding instructions can be found in the Codebook, which also is available via www.aussda.at (German version only).

Acknowledgement of the data

Data users are required to acknowledge the data and the accompanying release document. Please refer to the AUSSDA data catalogue (https://data.aussda.at, doi: 10.11587/IYGIBZ) for a recommendation on how to cite these data and the documentation.

1. Conditions of Use

1.1. Restrictions

The data are available under the terms listed at the AUSSDA Dataverse.

1.2. Confidentiality

AUTNES, the Principal Investigators and the funding institution bear no responsibility for the use of the data, or for interpretations or inferences based on their use, neither do they accept liability for indirect, consequential, or incidental damages or losses arising from the use of the data.

1.3. Deposit Requirement

In order to facilitate exchanges within the scientific community and to provide funding agencies with essential information about the use of archival resources, users of the AUTNES data are requested to notify the AUTNES team of all forms of publications referring to AUTNES data.

2. Study description

2.1. Title and Edition

AUTNES Manual Content Analysis of the Media Coverage 2017

2.2. Principal Investigators

Wolfgang C. Müller, University of Vienna (Supply Side)

Sylvia Kritzinger, University of Vienna (Demand Side)

Hajo G. Boomgaarden, University of Vienna (Media Side)

2.3. Funding and Acknowledgements

The study was carried out under the auspices of the ACIER - Austrian Cooperative Infrastructure for Electoral Research and VieCER - Vienna Center for Electoral Research, financed by the Austrian Federal Ministry of Education, Science and Research.

2.4. Data File Names

10730_da_en_v1_0.dta - Core data file - STATA format - 59 Variables, 9841 Observations

10730_da_en_v1_0.sav - Core data file - SPSS format - 59 Variables, 9841 Observations

10730_da_en_v1_0.csv - Core data file – CSV format - 59 Variables, 9841 Observations

2.5. Topics /Keywords

Election coverage, political issues, political actors

3. Study design

The data set is based on the manual coding of all political news reports published in Austrian print media outlets leading up to the Austrian National Election 2017. We define a news report as political when the report mentions a central political actor. Central political actors are

- designations such as government (coalition, governing parties) and opposition (opposition parties) on the national level
- members of the government before the election, on national, state and EU level
- ministries and state secretaries (Staatssekretäre) on the national level
- the Austrian President
- members of parliament before the election, both national and EU level, or the parliament as an institution
- Austrian political parties eligible on the national level, including demographically defined sub-organisations on the national level (e.g. for women)
- directorate members of demographically defined sub-organizations of Austrian parties (also political fractions in unions)
- political candidates running for parliament or office in the election

If any of these actors is mentioned in a news item, it was considered political news. The period of analysis ranges from 30 August until the election day on 14 October 2017. (Note that the media data can thus be synced to the survey waves 3 and 4 of the AUTNES voter panel; see AUTNES Online Panel Study 2017, doi:10.11587/I7QIYJ for more information on and documentation for the survey data.)

The coding was conducted in two separate periods. One part of the codebook was implemented between March 2018 and February 2019 by a total of six coders, the second part between May and November 2019 by four additional coders. The coding was conducted via the online content analysis platform AmCAT (see www.amcat.nl for more information and documentation.)

3.1. Media Sample

The media sample was selected based on the type and circulation to reflect the Austrian national print media landscape.

A total of 12860 items originally published in eight different print news outlets were downloaded from the Austrian Press Agency news archive (APA, www.apa-defacto.at). Of the eight news outlets three are quality newspapers, two of them are nationally distributed (*Der Standard, Die Presse*), one is mainly read in the state of Salzburg (*Salzburger Nachrichten*). Another three outlets are tabloid newspapers, two of them nationally distributed (*Kronen Zeitung, Österreich*), one is published for free in the states Vienna, Upper Austria and Lower Austria (*Heute*). The other two newspapers (*Kurier, Kleine Zeitung*) are distributed nationally but mostly read in only some parts of Austria, and both can be characterized as midrange newspapers between quality and tabloid newspaper with a regional focus. For an overview see Table 1

Table 1 Media Sample and characteristics of media outlets

Media outlet	Type	Publication	Searchstring identified	Relevant
Der Standard	Quality Newspaper	MO-SA	1,244	992
Die Presse	Quality Newspaper	MO-SU	1,109	871
Kronen Zeitung	Tabloid Newspaper	MO-SU	2,976	2,240
Heute	Free (tabloid) Newspaper	MO-FR	655	567
Kurier	Midrange Newspaper	MO-SU	2,160	1,637
Kleine Zeitung	Regional Newspaper	MO-SU	1,609	1,114
Österreich	Tabloid Newspaper	MO-SU	2,172	1,812
Salzburger Nachrichten	Quality Newspaper	MO-SA	935	608

3.2. Sample of News Items

To collect the data, articles for print newspapers were downloaded from the database of the Austria Presse Agentur (APA, www.apa-defacto.at), using the following search string containing the names of all Austrian political parties participating in the National Election

of 2017, the names of the chancellor, all ministers and secretaries of state, as well as the national parliament as an institution:

```
nationalrat* OR spö* OR övp* OR „liste kurz"~4 OR „neue* volkspartei" OR fpö* OR neos* OR "liste pilz"~4 OR „kurz övp"~5 OR „sebastian kurz"~4 OR „minister kurz"~5 OR „bundesminister* kurz"~5 OR „europa* kurz"~5 OR „integration* kurz"~5 OR „außenminister* kurz"~5 OR „äußeres* kurz"~5 OR „kurz volkspartei"~5 OR „kurz vp"~5 OR „kanzler* kern"~5 „bundeskanzler* kern"~5 „christian kern"~4 „kern spö"~5 „kern sozialdemokrat*"~5 OR „minister* stöger"~5 OR „bundesminister* stöger"~5 OR „gesundheit* stöger"~5 OR „sozial* stöger"~5 „arbeit* stöger"~5 OR "alois stöger"~4 OR „brandstetter minister*"~5 OR „bundesminister* brandstetter"~5 OR "wolfgang brandstetter"~4 OR „justiz* brandstetter"~5 OR doskozil OR drozda OR „minister* hammerschmid"~5 OR „bundesminister* hammerschmid"~5 OR "bildung* hammerschmid"~5 OR „sonja hammerschmid"~4 OR karmasin OR „leichtfried minister*"~5 OR „verkehrsminister* leichtfried"~5 "jörg leichtfried"~4 OR „minister* mahrer"~5 OR „bundesminister* mahrer"~5 OR „wirtschaft* mahrer"~5 OR „wissenschaft* mahrer"~5 OR „forschung* mahrer"~6 OR „staatssekretär* mahrer"~5 OR "harald mahrer"~4 OR „minister* rendi wagner"~5 OR „minister* wagner"~5 OR „bundesminister* rendi wagner"~5 OR „bundesminister* wagner"~5 OR „gesundheitsminister* wagner"~5 OR „gesundheitsminister* rendi wagner"~5 OR „frauenminister* wagner"~5 OR „frauenminister* rendi wagner"~5 OR „pamela rendi wagner"~5 OR „rendi wagner"~5 OR „minister* rupprechter"~5 OR "andrä rupprechter"~4 OR "landwirtschaftsminister* rupprechter"~5 OR „umweltminister* rupprechter"~5 OR „minister* schelling"~5 OR „finanzminister* schelling"~5 OR „hans jörg schelling"~4 „hans jörg schelling" OR "johann georg schelling" OR („minister* sobotka"~5 NOT tschechi*) OR „innenminister* sobotka"~5 OR "wolfgang sobotka"~4 OR "van der bellen" OR bundespräsident OR strache* OR "matthias strolz"~4 OR „neos* strolz"~6 OR lunacek OR "peter pilz"~4 OR „ex grün* pilz"~6 OR „grüne* pilz"~6 OR „politiker* pilz"~5 OR „aufdecker* pilz"~5 OR „untersuchung* pilz"~5 OR „abgeordnete* pilz"~5 „parlament* pilz"~5 OR lunacek OR "rot grün" OR "schwarz grün" OR ((„die grüne*" OR "der grüne*" OR "den grünen") NOT („grün* rasen"~2 OR „grün* wiese*"~2)) OR ökopartei OR grünpolitiker* OR "grün* politiker*"~4 OR "tiroler grüne*" OR "grüne* tirol" OR "wiener grüne*" OR "grüne* wien" OR "grüne* burgenland" OR "burgenländ* grüne*" OR "grüne* kärnten" OR "kärntner* grüne*" OR "grüne* salzburg" OR "salzburger* grüne*" OR "grüne* oberösterreich" OR "oberösterreichische* grüne*" OR "grüne* steiermark" OR
```

```
"steirische* grüne*" OR "grüne* vorarlberg" OR "vorarlberger grüne*" OR "grüne* niederösterreich*" OR "niederösterreichische* grüne*"
```

This resulted in a total of 12860 news items that were downloaded from the APA databank in a machine-readable format and uploaded to AmCAT. Duplicate articles in the APA database were identified and filtered based on the text and title of the article itself, the publication date as well as the medium it appeared in. If all those criteria were identical, an article was excluded from the set.

To identify and filter out false-positives – news items that were incorrectly identified as Austrian political news –two different "cleaning" steps were performed. Due to the German national Election that took place around the same time in 2017, a number of articles reporting on it were identified by the initial search string. Face validity checks ensured the validity of this search string, as the number of articles reporting on the 2017 German national Election was not sufficient to apply any other validation procedure. The articles were first identified using the following search string:

```
(merkel* OR seehofer OR weidel OR gauland OR petry OR "simone peter" OR söder OR lindner OR özdemir OR schulz OR nahles OR spd OR cdu OR csu OR fdp OR afd OR bundestagswahl) NOT (nationalrat* OR spö* OR övp* OR „liste kurz"~4 OR „neue* volkspartei" OR fpö* OR neos* OR "liste pilz"~4 OR „kurz övp"~5 OR „sebastian kurz"~4 OR „minister kurz"~5 OR „bundesminister* kurz"~5 OR „europa* kurz"~5 OR „integration* kurz"~5 OR „außenminister* kurz"~5 OR „äußeres* kurz"~5 OR „kurz volkspartei"~5 OR „kurz vp"~5 OR „kanzler* kern"~5 „bundeskanzler* kern"~5 „christian kern"~4 „kern spö"~5 „kern sozialdemokrat*"~5 OR „minister* stöger"~5 OR „bundesminister* stöger"~5 OR „gesundheit* stöger"~5 OR „sozial* stöger"~5 „arbeit* stöger"~5 OR "alois stöger"~4 OR „brandstetter minister*"~5 OR „bundesminister* brandstetter"~5 OR "wolfgang brandstetter"~4 OR „justiz* brandstetter"~5 OR doskozil OR drozda OR „minister* hammerschmid"~5 OR „bundesminister* hammerschmid"~5 OR "bildung* hammerschmid"~5 OR „sonja hammerschmid"~4 OR karmasin OR „leichtfried minister*"~5 OR „verkehrsminister* leichtfried"~5 "jörg leichtfried"~4 OR „minister* mahrer"~5 OR „bundesminister* mahrer"~5 OR „wirtschaft* mahrer"~5 OR „wissenschaft* mahrer"~5 OR „forschung* mahrer"~6 OR
```

```
„staatssekretär* mahrer‟~5 OR "harald mahrer"~4 OR „minister* rendi wagner‟~5 OR „minister* wagner‟~5 OR „bundesminister* rendi wagner‟~5 OR „bundesminister* wagner‟~5 OR „gesundheitsminister* wagner‟~5 OR „gesundheitsminister* rendi wagner‟~5 OR „frauenminister* wagner‟~5 OR „frauenminister* rendi wagner‟~5 OR „pamela rendi wagner‟~5 OR „rendi wagner‟~5 OR „minister* rupprechter‟~5 OR "andrä rupprechter"~4 OR "landwirtschaftsminister* rupprechter‟~5 OR „umweltminister* rupprechter‟~5 OR „minister* schelling‟~5 OR „finanzminister* schelling‟~5 OR „hans jörg schelling‟~4 „hans jörg schelling‟ OR "johann georg schelling" OR („minister* sobotka‟~5 NOT tschechi*) OR „innenminister* sobotka‟~5 OR "wolfgang sobotka"~4 OR "van der bellen" OR bundespräsident OR strache* OR "matthias strolz"~4 OR „neos* strolz‟~6 OR lunacek OR "peter pilz"~4 OR „ex grün* pilz‟~6 OR „grüne* pilz‟~6 OR „politiker* pilz‟~5 OR „aufdecker* pilz‟~5 OR „untersuchung* pilz‟~5 OR „abgeordnete* pilz‟~5 „parlament* pilz‟~5 OR lunacek OR "tiroler grüne*" OR "grüne* tirol" OR "wiener grüne*" OR "grüne* wien" OR "grüne* burgenland" OR "burgenländ* grüne*" OR "grüne* kärnten" OR "kärntner* grüne*" OR "grüne* salzburg" OR "salzburger* grüne*" OR "grüne* oberösterreich" OR "oberösterreichische* grüne*" OR "grüne* steiermark" OR "steirische* grüne*" OR "grüne* vorarlberg" OR "vorarlberger grüne*" OR "grüne* niederösterreich*" OR "niederösterreichische* grüne*")
```

Secondly, all remaining articles were manually checked for relevance by human coders. They selected only articles in which at least one central political actor was mentioned either by name or designation. This resulted in an eventual 9841 articles that were then manually coded.

4. Coding Procedure

4.1. Coding Procedure and Time Plan

Manual coding was conducted on the article level by two different groups of coders. The first group coded v8-v13 and v16-v25. Coder training for the first group started at the End of January 2018 (see Table 2). Six coders were trained for coding the variables v8-v13 and v16-v25. The second group consisting of four coders was tasked with the coding of the variables v14a-j and v15a-c. Coder training for this group started in the beginning of

February 2019 (see Table 2).

Table 2 Overview of coder trainings

Level of Coding	Date	Activity	Hours
Article Group 1	24.01.2018	How to do Amcat + Training Variables	4
Article Group 1	25.01.2018	Training Variables	3
Article Group 1	29.01.2018	Training Variables	3
Article Group 1	02.02.2018	Training Variables	3
Article Group 2	21.02.2019	Training Variables	2
Article Group 2	11.03.2019	Training Variables after the first reliability test	3
Article Group 2	02.05.2019	Training Variables after the second reliability test	3

4.2. Reliability Tests

As different coders were involved in the coding of variables, there were separate reliability tests for each group of coders.

To test the reliability of coding for the variables v8-v13 and v16-v25, one reliability test was conducted at the end of the training phase in April 2018 with a group of six coders. It was complemented by the second test for the same group of coders in June 2018. As three coders dropped out over the course of coding process, further reliability tests conducted in the period between September 2018 and February 2019 included three remaining coders. Table 3 provides an overview of reliability tests on article level.

To test the reliability of coding for the variables v14a-j and v15a-c, four reliability tests were conducted with four participating coders. The four coders for these variables are not the same as the coders involved into article-level coding discussed above. Two tests were run after the training phase and before the coding started. The other two tests were run in the middle of the coding phase and at the end of coding.

Table 3 Intercoder reliability on article level

Variable	Label	Reliability tests 1 & 2	Reliability tests 3, 4 & 5	Mean (weighted)
v8	Journalistic Format	0.725	0.780	0.749
v9_l1	Main Issue Level 1	0.789	0.667	0.736

v24	Media criticism	0.782	0.735	0.762
v25	Negative Campaigning	0.813	0.864	0.835

The variables v14a-j and v15a-c each assess three questions: is the actor mentioned? If yes, is there an evaluation of the actor or is the context neutral? And if there is an evaluation, is there a positive or negative tendency. Based on the variables' characteristics Krippendorff's Alpha was calculated for each variable three times. For an overview of intercoder reliability on the paragraph level see Tables 4-6.

Table 4 Intercoder reliability on paragraph level, Actor mentioned

4.3. Further Quality Measures

Meetings between the research team and the coders were organized on a regular basis to discuss coding difficulties and ensure the validity of the coding. All coders as well as researchers were additionally participating in a regular exchange in an online forum to discuss specific cases in a timely manner.

5. Coding

The coding process consisted of two parts:

1. meta level (v0-v7)
2. article level (v8- -v25)

The meta level comprises variables defining the media outlet, the article id, the sentence id and similar information that were gathered automatically from the APA sources or

generated automatically by AmCAT. The article level was coded manually. Both coding levels are combined in this dataset.

5.1. Meta Level

The meta level was automatically generated in AmCAT. No human coders were involved in this process. The meta information was gathered and/or generated after the Election Day, when all the news coverage was uploaded into AmCAT for manual coding.

5.2. Article Level

On the article level coders coded in total 18 variables for all media outlets in the sample. In the first phase of coding six coders coded the variables v8-v13 and v16-v25, in the second phase of coding, three coders remained. Each of the coders was regularly assigned a coding job containing one day of media coverage in specific media outlet to code using AmCAT.

In the third phase of the coding between March and November 2019, a team of four coders conducted coding of evaluations for the main candidates and parties (v14a-j and v15a-c). Each of the four coders involved was assigned a coding job containing approximately one quarter of all relevant articles.

5.3. List of coded Variables on each Level

The following table presents a list of all variables on the meta level that are included in the dataset as well as all variables on the article level that were coded manually. Recoded variables that are included in the final dataset are not shown in this table – see complete list of variables (6.2) for an overview of all variables included in the final dataset.

Meta Level	Article Level
v0 Article ID	v8 Journalistic Format
v1 Headline	v9 Main Issue
v2 Byline	v10 Perspective on the main issue
v3 Medium	v11 Issue topics
v4 Date	v12 Main Actor
v5 Page	v13 Citation Main Actor
v6 Section	v14a Evaluation SPÖ
v7 Word count	v14b Evaluation Christian Kern
	v14c Evaluation ÖVP
	v14d Evaluation Sebastian Kurz
	v14e Evaluation FPÖ
	v14f Evaluation Heinz-Christian Strache

Meta Level	Article Level
	v14g Evaluation Greens
	v14h Evaluation Ulrike Lunacek
	v14i Evaluation NEOS
	v14j Evaluation Matthias Strolz
	v14k Evaluation Liste Pilz
	v14l Evaluation Peter Pilz
	v15a Evaluation SPÖ-ÖVP coalition
	v15b Evaluation ÖVP-FPÖ coalition
	v15c Evaluation SPÖ-FPÖ coalition
	v16 Privatization
	v17 Human Interest
	v18 Substantial political Information
	v19 Reference to other Media
	v20 Reference to the Austrian public opinion polls
	v21 Reference to party communication
	v22 Expert statement
	v23 Citizen statement
	v24 Media criticism
	v25 Negative Campaigning

6. Data Cleaning and Preparation

After the manual coding was completed, the raw data was cleaned with the software package R. Articles and segments that the coders identified as irrelevant were excluded from the data. Finally, all variables and values were labelled.

6.1. Recodings

Several variables have been generated by various methods to compress the dataset and to ensure backwards compatibility with the AUTNES Manual Content Analysis of the Media Coverage 2013 (doi:10.4232/1.12565). Additionally, values in several variables were recoded to ensure that the dataset includes only persons of public interest and anonymize private persons.

Aggregations

The variables v3 media and v9 issue were recoded into three levels of aggregation. The lowest level is represented with the suffix _l3 and is the original coding. The suffixes _l2 and _l1 represent the aggregations done in R.

v6 Section

The section of the newspaper was automatically coded through the articles' metadata. However, due to the comparatively large variety of sections in newspapers (344), the sections were aggregated into 19 categories and saved in the variable v6_l1. The original strings are stored in v6_l2.

v8 Journalistic Format

This variable was also adjusted that its levels match with the corresponding variable from the AUTNES Manual Content Analysis of the Media Coverage 2013 (doi:10.4232/1.12565).

v12 Main Actor

Coders identified the articles' main actor, and it was saved as string (preserved in v12_str). The original variable contains all types of actors, regardless of being an individual or an organization. This coding was split into three different variables with the suffixes _IO, _I and _O by using a unified list of all actors identified in the study. Every actor has two unique IDs: one as an individual and one as part of an organization.

_IO (individual or organization): based on the original variable that was coded, directly transformed from string into a numeric. Each actor has a unique ID that also represents the actor's organizational affiliation (e.g. all actors who belong to the ÖVP have the prefix 12). Actors who have changed their affiliation in comparison to 2013, received a new ID that reflects the affiliation of the new organization.

_I (individual): similarly to _IO, except that organizations received the value 1 by default. The individual actors' unique ID differs from _IO, is in no specific order, and does not reflect any affiliation.

_O (organization): aggregated from _IO, it is a two-digit numeric variable that represents only the organization or the affiliation of an individual actor.

Anonymization

v1 Headline: Headlines of articles where main actor was anonymized (v12_io=9999999) or was not a person of public interest (v12_io=8900000) were deleted and set to "*Deleted (due to anonymization*)" (N=193).

v2 Byline: Set to "*Deleted (due to anonymization)*" if main actor was anonymized or was not a person of public interest or if byline included an e-mail address (N=314).

v12_i Main Actor Individual: Set to 9999999 (*Anonymized*) if main actor was not a person of public interest (N=31).

v12_io Main Actor individual or organization: Set to 9999999 (*Anonymized*) if v12_i was anonymized (N=31).

6.2. Complete List of all Variables on each Level

Meta Level	Article Level
v0 Article ID	v8 Journalistic Format
v1 Headline	v9_l1 Main Issue Level 1
v2 Byline	v9_l2 Main Issue Level 2
v3_l1 Medium Level 1	v9_l3 Main Issue Level 3
v3_l2 Medium Level 2	v10 Perspective on the main issue
v3_l3 Medium Level 3	v11a Job market and Employment
v4 Date	v11b Housing
v5 Page	v11c Pensions
v6_l1 Section Level 1	v11d Animal welfare and Environment
v6_l2 Section Level 2	v11e European Integration
V7_Word count	v11f Health and Foster Care
	v11g Security, Crime and Terrorism
	v11h Economy, Budget and Taxes
	v11i Corruption and Fight against Corruption
	v11j Migration and Asylum
	v11k Protection of Minors, Children and Family
	v11l Education and Research
	v12_i Main Actor individual
	v12_io Main Actor individual or organization
	v12_o Main Actor organization
	v13 Citation Main Actor
	v14a Evaluation SPÖ
	v14b Evaluation Christian Kern
	v14c Evaluation ÖVP
	v14d Evaluation Sebastian Kurz
	v14e Evaluation FPÖ
	v14f Evaluation Heinz-Christian Strache
	v14g Evaluation Greens
	v14h Evaluation Ulrike Lunacek
	v14i Evaluation NEOS
	v14j Evaluation Matthias Strolz
	v14k Evaluation Liste Pilz
	v14l Evaluation Peter Pilz
	v15a Evaluation SPÖ-ÖVP coalition
	v15b Evaluation ÖVP-FPÖ coalition
	v15c Evaluation SPÖ-FPÖ coalition
	v16 Privatization
	v17 Human Interest
	v18 Substantial political Information
	v19 Reference to other Media
	v20 Reference to the Austrian public opinion polls
	v21 Reference to party communication
	v22 Expert statement
	v23 Citizen statement
	v24 Media criticism
	v25 Negative Campaigning

7. Data Set

In this section, we present a short overview of all variables in our dataset. To maintain clarity, recoded variables are shown in their most aggregated form. In addition to frequency tables, a short nominal description is given for each variable.

v6_l1 Section level 1

This variable was coded automatically. It identifies the section in which an article was published.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Title Page	9.9	6.8	1.8	3.0	1.9	0.4	1.7	3.7

Note: Percentage totals may be subject to rounding errors associated with individual components

v7 Word count

This variable was coded automatically. It identifies the number of words used per article.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Mean	368.6	397.4	293.1	156.2	163.2	91.9	246.4	213.1
sd	299.1	303.9	261.0	141.2	172.6	87.2	239.8	186.8

v8 Journalistic Format

This variable determines the journalistic format of an article.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Headline, Report, Reportage, Analysis, Feature	71.2	65.1	79.1	74.6	92.1	91.5	80.5	73.9

Note: Percentage totals may be subject to rounding errors associated with individual components

v9 Main Issue Level 1

This variable determines the issue which occupied the most space in an article. If two issues occupied the exact same amount of space, the one that appeared first was coded as the main issue.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Economy	6.5	8.2	6.9	6.9	6.6	4.1	6.5	5.2
Welfare state	6.2	4.9	5.9	6.8	4.8	4.9	6.4	5.5

Politics	32.8	34.1	38.2	41.1	48.5	45.9	38.1	36.5
Politicians in news coverage	1.8	1.4	2.8	5.5	6.2	7.6	3.1	5.8
Not classifiable	0.9	0.6	0.5	0.4	0.5	1.8	0.7	0.5
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v10 Perspective on the main issue

This variable determines the perspective on the main issue in an article. For policy issues this refers to whether the main issue is discussed positively, negatively or neutrally/ambivalently.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Negative	25.6	21.5	19.4	19.3	8.8	11.8	14.2	15.8
Neutral	69.1	71.2	75.5	67.3	83.4	81.0	77.5	73.3
Positive	5.3	7.4	5.1	13.4	7.7	7.2	8.4	11.0
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v11 Issue topics

This variable determines whether any of the specifically listed policy issue topics is mentioned in the article. These are the following policy topics:

V11a Job market and Employment

V11b Housing

V11c Pensions

V11d Animal welfare and Environment

V11e European Integration

V11f Health and Foster Care

V11g Security, Crime and Terrorism

V11h Economy, Budget and Taxes

V11i Corruption and Fight against Corruption

V11j Migration and Asylum

V11k Protection of Minors, Children and Family

V11l Education and Research

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Job market and Employment	11.9	13.7	12.7	6.7	6.3	7.8	9.5	10.3
Housing	5.1	5.2	5.3	3.8	3.3	2.8	4.4	3.0

Note: Percentage totals may be subject to rounding errors associated with individual components

v12_O Main Actor Organisation

This variable determines the organisation or group of actors which occupied the most space in an article. If two organizations occupied the exact same amount of space, the one that appeared first was coded as the main actor. The List of Actors (Individual and Organisation) will be available on www.autnes.at as of summer 2020.

Positive tendency	0.2	0.6			0.6		0.1	
Clearly positive		0.1						
Neutral/No tendency	0.8	2.0	0.7	0.6	1.6	1.6	1.0	0.7
Coalition not mentioned	96.7	95.1	97.7	99.0	95.1	98.2	97.1	98.5
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v16 Privatization

This variable determines if the article includes descriptions of privatization of politics, the private life of politicians, such as information about family or their pre-political past.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No description	89.6	90.0	91.0	93.5	93.2	88.9	94.3	94.3
At least one description	8.2	8.4	7.4	5.2	4.9	7.4	5.3	5.4
Descriptions are predominant	2.2	1.6	1.6	1.3	1.9	3.7	0.4	0.3
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v17 Human Interest

This variable determines if the article presents a description of the social circumstances of unknown citizens.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No description	96.9	97.6	98.0	98.0	99.8	97.7	98.1	98.1
At least one description	2.4	1.5	1.2	1.2		1.1	1.5	1.4
Descriptions are predominant	0.7	0.9	0.8	0.8	0.2	1.2	0.4	0.5
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v18 Substantial political Information

This variable determines if the article provides substantial political information (policy relevant information).

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No information of policy (except mention of policy area)	56.5	57.3	54.0	66.8	68.1	66.7	64.6	60.5
Superficial information about policy	21.4	15.0	18.1	15.4	17.2	26.8	14.1	18.0
Information about policy, discussed in several sentences	22.2	27.7	28.0	17.8	14.7	6.5	21.3	21.5
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v19 Reference to other Media

This variable determines if the article includes a reference to other media outlets.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Not mentioned	77.7	82.2	85.9	92.1	81.3	85.4	82.7	89.6
Mentioned	22.3	17.8	14.1	7.9	18.7	14.6	17.3	10.4
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v20 Reference to Austrian public opinion polls

This variable determines if the article mentions Austrian public opinion polls.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Not mentioned	96.5	95.8	95.9	97.5	93.7	98.1	96.7	97.1
Mentioned	3.5	4.3	4.1	2.5	6.3	1.9	3.3	2.9
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v21 Reference to party communication

This variable determines if the article mentions party campaign communication.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
Not mentioned	78.3	75.1	77.6	87.8	79.1	78.1	84.8	82.2
Mentioned	21.7	24.9	22.4	12.2	20.9	21.9	15.2	17.8
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v22 Expert statement

This variable determines whether an external expert was cited in the article.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No expert statement or quote	88.6	94.5	91.5	96.6	98.2	98.8	92.9	96.1
Expert statement or quote	11.4	5.5	8.6	3.4	1.8	1.2	7.2	4.0
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v23 Citizen statement

This variable determines whether citizens are cited in the article.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No statement or quote of a citizen	95.8	93.3	95.6	90.0	99.0	98.1	97.7	90.8
Statement or quote of a citizen	4.2	6.7	4.4	10.0	1.0	1.9	2.3	9.3
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v24 Media criticism

This variable determines whether the media in general or any specific media outlet are criticized in the article.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No criticism of the media	94.6	94.6	96.7	97.6	98.2	98.4	97.3	97.1
The media is criticized	5.4	5.4	3.3	2.4	1.8	1.6	2.7	2.9
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components

v25 Negative Campaigning

This variable determines whether the article discusses negative campaigning or any aspects of negative campaigning.

	Der Standard	Die Presse	Salzburger Nachrichten	Kronen Zeitung	Österreich	Heute	Kurier	Kleine Zeitung
No negative campaigning	85.1	88.2	90.5	92.7	93.4	93.1	92.4	92.3
Contains negative campaigning	14.9	11.8	9.5	7.3	6.6	6.9	7.6	7.7
N	*992*	*871*	*608*	*2240*	*1812*	*567*	*1637*	*1114*

Note: Percentage totals may be subject to rounding errors associated with individual components
