Research Data at University of Klagenfurt

Background to the survey

The information you provide will be used for the purpose of assessing your use of research data and improving research data management support for researchers at the University of Klagenfurt.

During the survey you can return to previous questions. Answering the questions is voluntary and anonymous. Your data will be stored in anonymized form and only evaluated in aggregated form.

There are 34 questions in this survey.

Table of Contents

Research Data at University of Klagenfurt 1

I. Scientific classification 3

Field of Science 3

Employment status 3

II. Collection/generation of research data 3

FD1: What types of research data do you work with (measurement data, test data, interview transcripts, texts, audiovisual content, social media, etc.)? 3

FD2: What digital formats does your research data have? 3

FD3: Which percentage of the scientific literature you consult do you use in digital form (e.g. as a PDF)? 4

FD4: Which file formats do you use when you generate and store digital research data? 4

FD5: How often do you collect sensitive or confidential research data (e.g. biometric or other personal data)? 4

FD6: Please estimate the total size of your research data in relation to the required storage space (estimated average value per year). 5

III. Data management plan 5

FD17: Have you ever had to create a data management plan for a research project? 5

FD17a: Which funding organisation requested the DMP? 5

FD18: Did you encounter any difficulties when completing the data management plan? If yes, please specify! 5

IV. Data management in research practice 6

FD7: If you store research data, where do you store it? 6

FD8: Do you protect your research data with a password? 6

FD9: Do you use data protection provisions in your research (e.g. anonymisation to protect personal data)? 6

FD10: Is your research data subject to the FAIR principles? 6

FD11: How do you currently share your data within the research team in the context of a research project? 7

V. Data publication 7
FD12: For which target group do you make your research data accessible (taking into account the GDPR and discipline-specific ethical standards)? 7
FD13: How can third parties access your research data? 8
FD14: Have you encountered situations in which you had to disclose research data (e.g. for publications or in the course of third-party funded projects)? 8
FD15: Have you already published in a journal that requires disclosure of your methods and data in the course of preregistration? 8
FD16: How likely do you think it is that you will carry out a preregistration for a scientific contribution (e.g. journal article) in the future? 9
VI. Reuse of your own data 9
FD19: Do you determine in advance for your research data whether and, if so, how this specifically prepared data may be further used and processed? 9
FD20: Do you share your research data with third parties for reuse? 9
FD21: What might discourage you from sharing your research data with third parties? 9
VII. Reuse of third-party research data 10
FD22: How often do you use third-party research data for your research? 10
FD23: Are you interested in making greater use of secondary analyses based on published research data for your research in the future? 10
FD24: Do you use third-party research data in your teaching? 10
FD25: In the future, are you interested in conducting secondary analyses using published research data for your teaching? 11
FD26: If you are using existing third-party research data, how do you obtain it? 11
FD26b: If available, you could specify other ways of accessing third-party research data here. . 11
VIII. Closing questions on infrastructure and services 12
FD27: Which research data archive would you prefer to use, assuming that there are no costs for you and your organisation? 12
FD28: Are you interested in a workshop at the University of Klagenfurt on research data management issues (repositories, data protection, DMPs, etc.)? 12
FD29: What other support services for handling research data would you be interested in at the University of Klagenfurt? 12
FD30: Do you have any further comments or suggestions on the subject of research data? 13

I. Scientific classification

Field of Science

Please select the scientific disciplines to which you feel you primarily belong.

Check all that apply

Please choose **all that apply**:

- Humanities
- Human Medicine, Health Sciences
- Natural Sciences
- Social Sciences
- Technical Sciences

Employment status

Please assign yourself to a category:

Choose one of the following answers

Please choose **only one** of the following:

- Researchers financed by the global budget
- Researchers financed by third-party funds
- Doctoral students not employed by the university

II. Collection/generation of research data

FD1: What types of research data do you work with (measurement data, test data, interview transcripts, texts, audiovisual content, social media, etc.)?

Please note these in the free text field:

Please write your answer here:

Research data is digital or analogue data that is generated or processed in the course of scientific activity (e.g. through measurements, surveys, source work).

FD2: What digital formats does your research data have?

Please select all that apply and also take into account that certain research data is available in several formats:

Check all that apply

Please choose **all** that apply:

- Text documents (DOC, ODF, PDF, TXT, etc.)
- Structured text (HTML, JSON, TEX, XML etc.)

- Spreadsheets (XLS, ODS, CSV, SAS, Stata, SPSS etc.)
- Databases (MS Access, MySql, Oracle etc.)
- Graphics/images (JPEG, SVG, PNG, GIF, TIFF etc.)
- Audio (MP3, WAV, AIFF, OGG etc.)
- Video/Film (MPEG, AVI, WMV, MP4 etc.)
- Software applications source code (CSS, JavaScript, Java etc.)
- Configuration data (INI, CONF etc.)
- Software applications
- Physical objects (e.g. samples of any kind)
- Other:

FD3: Which percentage of the scientific literature you consult do you use in digital form (e.g. as a PDF)?

Only numbers may be entered in these fields.

Each answer must be between 0 and 100

Please write your answer(s) here:

Please enter the estimated percentage value here

FD4: Which file formats do you use when you generate and store digital research data?

Please select the applicable option:

Please choose the appropriate response for each item:

	Very often	Often	Rarely	Never
proprietary formats (.doc /.docx, .xls/.xlsx bzw. MS Word, Excel, SPSS etc.)				
open source formats (.rtf, .txt, .csv, .tif, .odt bzw. LibreOffice etc.)				

FD5: How often do you collect sensitive or confidential research data (e.g. biometric or other personal data)?

Please choose the appropriate response for each item:

	Very often	Often	Rarely	Never

FD6: Please estimate the total size of your research data in relation to the required storage space (estimated average value per year).

Choose one of the following answers

Please choose **only one** of the following:

- Small (< 50 GB)
- Medium (50-100 GB)
- Large (101 GB-1 TB)
- Very large (1 TB-1 PB)
- Big (> 1 PB)
- I can't estimate it.

Make a comment on your choice here:

III. Data management plan

FD17: Have you ever had to create a data management plan for a research project?

Choose one of the following answers

Please choose **only one** of the following:

- Yes, as part of a research project.
- No.

FD17a: Which funding organisation requested the DMP?

Only answer this question if the following conditions are met:

Answer was 'Yes, as part of a research project.' at question '9 [FD17]' (Have you ever had to create a data management plan for a research project?)

Check all that apply

Please choose **all** that apply:

- FWF
- FFG
- Horizon Europe
- Erasmus+
- Other:

FD18: Did you encounter any difficulties when completing the data management plan? If yes, please specify!

Please write your answer here:

IV. Data management in research practice

FD7: If you store research data, where do you store it?

Check all that apply

Please choose **all** that apply:

- on the hard disc of my workstation computer
- on the hard disc of my personal computer
- on an institutional server
- on a research data repository
- on cloud servers provided by the university
- on cloud services provided by third parties (e.g. Google)
- on an external hard drive (including USB stick)
- on CDs / DVDs
- directly on the measuring device or instrument
- Other:

FD8: Do you protect your research data with a password?

Please choose the appropriate response for each item:

	Very often	Often	Rarely	Never

FD9: Do you use data protection provisions in your research (e.g. anonymisation to protect personal data)?

Please choose the appropriate response for each item:

	Very often	Often	Rarely	Never

FD10: Is your research data subject to the FAIR principles?

The research data that I/my team produce are ...

Please choose the appropriate response for each item:

	Very often	Often	Rarely	Never
findable for third parties.				
accessible to third parties.				

	Very often	Often	Rarely	Never
interoperable, i.e. we comply with common technical standards to make our data compatible in different systems (e.g. by using open file formats).				
reusable by third parties.				

The FAIR principles state that research data should be findable, accessible, interoperable (technically comparable) and reusable by third parties. They form the basis for the reuse of data by third parties across disciplines and countries.

FD11: How do you currently share your data within the research team in the context of a research project?

Check all that apply

Please choose **all** that apply:

- By email
- Via the university server
- Via Confluence
- Via Moodle
- Via file sharing service (e.g. ACOnet FileSender)
- Via Seafile
- Via a repository (e.g. Zenodo)
- Via commercial services (e.g. Dropbox, GoogleDrive, Wetransfer, etc.)
- Other:

V. Data publication

FD12: For which target group do you make your research data accessible (taking into account the GDPR and discipline-specific ethical standards)?

Please choose the appropriate response for each item:

	Yes	Rather yes	Rather no	No
For the general public				
For the scientific community				
For authorised users (e.g. members of the faculty)				
For interested persons upon request				

	Yes	Rather yes	Rather no	No
The data is not made accessible.				

Data publication goes beyond sharing within the scientific project team and includes the accessibility of one's own research data for third parties. Certified research data repositories are suitable for both short-term sharing with third parties and long-term archiving.

FD13: How can third parties access your research data?

Please choose the appropriate response for each item:

	True.	Rather true.	Rather not true.	False.
Via a data archive/repository				
As linked supplementary material for publications				
Via the personal or institutional website				
Via remote server or shared drives				
Via cloud applications (Dropbox, Google Docs, etc.)				
Via physical data carriers and/or email				

FD14: Have you encountered situations in which you had to disclose research data (e.g. for publications or in the course of third-party funded projects)?

Choose one of the following answers

Please choose **only one** of the following:

- Very often
- Often
- Rarely
- Never
- Other

FD15: Have you already published in a journal that requires disclosure of your methods and data in the course of preregistration?

Choose one of the following answers

Please choose **only one** of the following:

- Yes
- No
- Other

Prior to data collection, detailed preregistrations can be submitted as papers to an increasing number of journals in the form of preregistered reports.

FD16: How likely do you think it is that you will carry out a preregistration for a scientific contribution (e.g. journal article) in the future?

Choose one of the following answers

Please choose **only one** of the following:

- Very likely
- Likely
- Rather unlikely
- Unlikely
- Other

VI. Reuse of your own data

FD19: Do you determine in advance for your research data whether and, if so, how this specifically prepared data may be further used and processed?

Choose one of the following answers

Please choose **only one** of the following:

- Yes
- Rather yes
- Rather no
- No
- Other

The reusability of research data goes beyond its accessibility. Making data reusable implies, among other things, that it is determined whether and possibly also how this data may be reused and processed (e.g. through the use of Creative Commons licenses).

FD20: Do you share your research data with third parties for reuse?

Choose one of the following answers

Please choose **only one** of the following:

- Yes
- Sometimes
- No

FD21: What might discourage you from sharing your research data with third parties?

Check all that apply

Please choose **all** that apply:

- Data protection infringement
- Other legal restrictions (e.g. copyright, patent law, trademark protection, protection of use)
- Increased time and/or costs
- Risk of misinterpretation and/or falsification of the data
- Potential undesired commercial use
- Risk of misuse
- Loss/weakening of competitive advantage
- Increased competitive pressure in publishing
- Lack of data standards
- Lack of data processing
- Lack of or insufficient support from your institution
- Use of rare data formats
- Lack of motivation to share data
- Other:

VII. Reuse of third-party research data

FD22: How often do you use third-party research data for your research?

Choose one of the following answers

Please choose **only one** of the following:

- Very often
- Often
- Rarely
- Never

FD23: Are you interested in making greater use of secondary analyses based on published research data for your research in the future?

Choose one of the following answers

Please choose **only one** of the following:

- Very interested
- Rather interested
- Less interested
- Not interested

FD24: Do you use third-party research data in your teaching?

Choose one of the following answers

Please choose **only one** of the following:

- Very often

- Often
- Rarely
- Never

FD25: In the future, are you interested in conducting secondary analyses using published research data for your teaching?

Choose one of the following answers

Please choose **only one** of the following:

- Very interested
- Rather interested
- Less interested
- Not interested

FD26: If you are using existing third-party research data, how do you obtain it?

Please choose the appropriate response for each item:

	True.	Rather true.	Rather not true.	False.
I obtain data through direct contact with data producers.				
I obtain data through supplementary files linked to publications.				
I obtain data from data repositories or similar platforms.				
Colleagues recommend/share data with me.				
I carry out open searches (e.g. PubMed, Google Scholar, Microsoft Academic, web search).				
I search subscribed databases (e.g. Data Citation Index).				
I search the websites of researchers.				
I do not use existing research data.				

FD26b: If available, you could specify other ways of accessing third-party research data here.

Please write your answer here:

VIII. Closing questions on infrastructure and services

FD27: Which research data archive would you prefer to use, assuming that there are no costs for you and your organisation?

Please select a value from 0-10, where 0 means "I wouldn't use it at all" and 10 means "I would always use it".

Only numbers may be entered in these fields.

Each answer must be between 0 and 10

Please write your answer(s) here:

- International multidisciplinary data archive (e.g. Zenodo)
- International subject-specific data archive (e.g. arXiv)
- National multidisciplinary data archive
- National subject-specific data archive (e.g. AUSSDA)
- Central data archive of my institution
- Decentralized data archive of my institution

FD28: Are you interested in a workshop at the University of Klagenfurt on research data management issues (repositories, data protection, DMPs, etc.)?

Please indicate in the comments field if you have any special interests (DMP, data protection, etc.):

Choose one of the following answers

Please choose **only one** of the following:

- Very interested
- Rather interested
- Less interested
- Not interested

Make a comment on your choice here:

FD29: What other support services for handling research data would you be interested in at the University of Klagenfurt?

Please choose the appropriate response for each item:

	Very interested	Rather interested	Rather not interested	Not interested
Specific support from a data steward for data management				

	Very interested	Rather interested	Rather not interested	Not interested
(e.g. data preparation, creation of a data management plan)				
Support with data protection/data privacy questions				
Legal advice (copyright law, patent law, contracts, intellectual property rights)				
Specific support for the technical infrastructure (e.g. from the ZID)				
A general guideline or policy on research data management at the University of Klagenfurt				
Establishing research data management as teaching content in the curriculum				

FD30: Do you have any further comments or suggestions on the subject of research data?

Please write your answer here:

Thank you for your participation!

If you have any questions, please contact Karoline Feyertag as the contact person for research data management and open data at the research support service: karoline.feyertag@aau.at

Submit your survey.
Thank you for completing this survey.
