1 Introduction

1.1 How to cite these data

Meltzer, Christine; Eberl, Jakob-Moritz; Theorin, Nora; Lind, Fabienne; Heidenreich, Tobias; Galyga, Sebastian; Boomgaarden, Hajo; Strömbäck, Jesper; Schemer, Christian. 2019. REMINDER: Online-Panel Study on Migration and Mobility Attitudes 2017-2018. Dataset, doi:10.11587/LBSMPQ, AUSSDA Dataverse.

1.2 Changes in Editions

-

2 Conditions of Use

2.1 Restrictions

The data are available for scientific use without restrictions.

2.2 Confidentiality

The REMINDER research team, its Principal Investigators, and the funding institutions neither take responsibility for the use of the data or interpretations and inferences on their use, nor do they accept liability for indirect, consequential, or incidental damages or losses arising from the use of the data.

2.3 Deposit Requirement

In order to facilitate exchange within the scientific community and to provide the funding agencies with essential information about the use of archival sources, users of the REMINDER data are asked to notify the REMINDER team of publications based on its data.

3 Study Description

3.1 Title and Edition

REMINDER Online-Panel Study on Migration and Mobility Attitudes 2017-2018

3.2 Principal Investigators

Meltzer, Christine; Eberl, Jakob-Moritz; Theorin, Nora; Lind, Fabienne; Heidenreich, Tobias; Galyga, Sebastian; Boomgaarden, Hajo; Strömbäck, Jesper; Schemer, Christian

3.3 Funding / Acknowledgements

This work was supported by Horizon 2020 Framework Programme [grant number 727072].

Europe, European Union, Migration, Media effects, Freedom of Movement, Public Opinion

4 Study Design

4.1 Sampling

The universe of the survey corresponds to adult general population (aged 18+) residing in each of the seven EU Member States covered by this survey: Germany, Hungary, Poland, Romania, Spain, Sweden, and United Kingdom.

All respondents were approached through online panels. Respondents were classified by socio-demographic characteristics into quotas set on age, gender and region to ensure a representative sample. The quotas for general population were based on the gender of the respondent (male or female), the age cohort (five groups: 18 to 24; 25 to 39; 40 to 54; 55 to 64; and 65 or older) and region (country-specific entities, based upon Eurostat's NUTS2 classification).

All respondents who participated in the first wave were invited to participate in the second and third wave, with no quotas set.

4.2 Field Work

The fieldwork was conducted by Kanter TNS within the following periods (see Table 3). Table 3 also provides the average interview length.

Table 3. Fieldwork and interview length

Wave #	Fieldwork period	Interview length (in min.)	Number or respondents (completes)
Wave 1	05/12/2017 – 05/01/18	[13,93] / 16,44	22.869
Wave 2	06/06/2018 – 16/07/2018	[18,27] / 21,88	11.429
Wave 3	16/10/2018 – 05/11/2018	[15,85] / 18,48	7.367

(Note: Interview length denotes [median] / mean)

4.3 Panel participation

All respondents who participated in the first wave were invited to participate in the second and third wave, with no quotas set.

Overview response rates

Response rates overview								
	COUNTRY							
	Germany	Hungary	Poland	Romania	Spain	Sweden	UK	TOTAL
ACCEPTED	5406	4868	4843	4438	5040	4571	5496	**34662**
Device Failure	0	0	0	0	0	0	0	0
Screened out *	21	36	35	76	14	34	19	235
CONFIRMED ELIGIBILITY	5385	4832	4808	4362	5026	4537	5477	**34427**
Full quota **	1825	1153	1020	695	1452	836	1676	8657
Abandoned ***	328	409	388	417	344	451	564	2901
TOTAL COMPLETES	3232	3270	3400	3250	3230	3250	3237	**22869**

* **Screening questions are country (1) and age (2), asked in that order.**
Panelists declaring to reside in one of the 10 surveyed countries and to be 18 or older were screened in.
Panelists entering the survey but not answering the first question are not considered to have accepted.
** **Respondents were eligible and able but not selected because their cross-quota (gender*age*region) had enough cases.**
*** **Respondents were eligible, able and selected but they abandoned the interview before answering all questions.**
**** **Data cleaning was performed on complete interviews according to criteria detailed in section 5.**

1Resonse rate wave 1

Response rates overview								
	COUNTRY							
	Germany	Hungary	Poland	Romania	Spain	Sweden	UK	TOTAL
ACCEPTED	1978	1696	1877	1502	1903	1764	1852	**12572**
Device Failure	0	0	0	0	0	0	0	0
Screened out *	54	62	94	48	119	68	47	492
CONFIRMED ELIGIBILITY	1924	1634	1783	1454	1784	1696	1805	**12080**

Abandoned ***	83	121	103	80	56	117	91	651
TOTAL COMPLETES	1841	1513	1680	1374	1728	1579	1714	**11429**

* Respondents were screened out if they did not match the gender and year of birth criteria from wave 1
** No quotas were set for wave 2
*** Respondents were eligible, able and selected but they abandoned the interview before answering all questions.

2 Response rate wave 2

Response rates overview								
	COUNTRY							
	Germany	Hungary	Poland	Romania	Spain	Sweden	UK	TOTAL
ACCEPTED	1242	1039	1215	1006	1219	1019	1039	**7779**
Device Failure	0	0	0	0	0	0	0	0
Screened out *	26	17	30	19	26	10	13	141
CONFIRMED ELIGIBILITY	1216	1022	1185	987	1193	1009	1026	**7638**
Full quota **	0	0	0	0	0	0	0	0
Abandoned ***	41	44	45	48	27	30	36	271
TOTAL COMPLETES	1175	978	1140	939	1166	979	990	**7367**

* Respondents were screened out if they did not match the gender and year of birth criteria from wave 1
** No quotas were set for wave 3
*** Respondents were eligible, able and selected but they abandoned the interview before answering all questions.

3. Response rate wave 3

5 Data cleaning

Between 3% and 6% of individuals were screened out in wave two and between 1% and 2% in wave three for not matching the same gender and year of birth as the first wave.

To apply quality controls, please see 5.2

5.1 Data protection

License for use for scientific purposes only.

5.2 Quality assurance and excluded respondents

There are two procedures of quality control. There is a basic (variable EX1) and an advanced procedure of quality control (EX2).

The basic procedure of quality control (EX1) excludes all respondent to which the following rules apply:

1. Have taken less than 20% of the median time to complete the survey.
2. OR: Have answered „don't know" in more than 40% of the questions.
3. OR: Have been streamlining on a large portion of the questions.

The advanced procedure of quality control (EX2) excludes all respondents to which the following rules apply:

1. Have taken less than 50% of the median time to complete the survey.
2. AND: Answered our trap question wrong.

To exclude respondents based on quality control concerns – use the EX1 and EX2 variables. When you look at descriptives, please use [aw=WEIGHTEX1] and [aw=WEIGHTEX2] accordingly.

In wave 2 and 3, we additionally included a quality control questions (W2_CC; W3_CC). Respondents were asked to confirm the country they resided in. The correct answer was displayed for each country, next to two wrong answers (Austria and Denmark). To exclude respondents based on this quality control, exclude all who did NOT answer 2 = [country] on W2_CC and W3_CC.

5.3 Variable format and missing values

Variable format is numeric.

Missing values: Code 99 or Code 999

6 Weighting of data

For the construction of the weight variables in wave 1, a rim weighting procedure will run against the population figures. The procedure is executed separately for each country. Rim weighting consists of iterations; sample counts for each weight variable class are adjusted to fit the actual population proportions (marginal percentages), using as the initial values the result of the previous adjustment.

No additional weights were applied in wave 2 and wave 3 to avoid large weight coefficients which in turn have unwanted effects on the data outputs relying disproportionally on replies of individuals who are underrepresented in the sample compared to the original targets.

7 Complete Variable List

The complete variable list can be found in an extra file “10085_co_en_v1_0.pdf”.

8 Changes

For reasons of anonymisation, the following changes were made to the data set:

AGE EXACT (W1_Q2A): All persons older than 80 were combined into: “81 and older”.

REGION (W1_Q48):

- 119 DE-Bremen was combined with 111 DE-Schleswig Holstein/Hamburg/Niedersachsen.
- 227 ES-La Rioja was combined with 224 ES-Navarra.

NATIONALITY (W1_Q3) was modified, so that the seven countries under investigation remain in the Dataset (W1_Q3_1_1 – W1_Q3_1_7). All other mentioned nationalities were combined into W1_Q3_1_8 “Other”.

MIGRATION BACKGROUND II W1_Q5: All countries that received < 20 mentions were recoded to 98 “Other”.

EDUCATION W1_Q40_1: 1 “Vorschulische Erziehung bis zum Beginn der schulischen Grundbildung ” and 2“ Grundbildung in Lesen, Schreiben, und Rechnen“ were combined into 1 „Vorschulische Erziehung bis zum Beginn der schulischen Grundbildung, Grundbildung in Lesen, Schreiben“.

EDUCATION W1_Q40_6: 1 „brak formalnego wyksztalcenia lub niepelne podstawowe“ and 2 “podstawowe” were combined into 1 “brak formalnego wyksztalcenia lub niepelne podstawowe, podstawowe“.

EDUCATION W1_Q40_7:

- 1 „fara scoala” 2 “Scoala primara neterminata” and 3 “scoala primara terminate were combined into 1 “fara scoala - scoala primara terminata “.
- 4 “gimnaziu incomplet” and 5 “gimnaziu complet” were combined into 5 “gimnaziu incomplet & complet”.
- 6 “scoala de ucenici” and 7 “scoala profesionala” were combine into 7 “scoala de ucenici & scoala profesionala”.

MOTHER BORN (W2_Q57) and FATHER BORN (W2_Q56): All countries that received < 20 mentions were recoded to 999 “Other”.

RELIGION (W2_Q87):

- 7 “Muslim/ Alevism” 8 “Muslim/ Shia” 9 “Muslim/ Sunni” 10 “Muslim/ Other” were combined into 7 “Muslim”.
- 11 “Hindu” 12 “Buddhist” 13 “Shinto” 14 “Sikh” were combined into “Other”.

All answers to open-ended questions defined as string variables were removed from the dataset.
