Codebook: New Entrance to Mountain Farming in the Austrian Alps

The topics discussed in each interview with **new entrants to mountain farming** included *biographic background*, *routes into farming*, *living* and *working environments*, *management techniques*, *farming methods*, *collaborations* and *entry challenges*. All interviews were recorded, transcribed and subsequently coded with and analysed in MAXQDA according to the *Grounded Theory* techniques of Corbin & Strauss (2015). Thereby coding means:

> "the process of assigning one or more codes to a segment that you have selected with your mouse in the "Document Browser". This process allows you to, for example, conduct a systematic qualitative content analysis. So, what is a "code", exactly? Libraries have always used keyword catalogs, and researchers in the social sciences should also be familiar with the use of "categories", for example from the grounded theory approach or from content analyses. Other synonyms are "keyword" or "label". What the code represents depends on the task and the given situation. Broadly speaking, however, a code is a tool for identifying the content of a document, perhaps classifying it, and making it easier to find it again. Codes create order – this can be illustrated by the example of the keyword catalog. These catalogs help you find the right book and at the same time provide an overview of the topics on which the library has many or just a few books. Of course, how useful such a catalog is will depend on the complexity and usability of the index system and on the accuracy of the keywords used. In technical terms, a code in MAXQDA is a text of up to 63 characters. Codes are like card index boxes that contain index cards to which text passages, parts of images, or video segments are attached and on which a category name is written at the top. The name of a code is like a label that acts as a tab in the index box. This label can be easily changed without affecting the structure of the index box or the index cards themselves." (MAXQDA 2022)

Code Table

Code system according to different levels: The codes have a hierarchical structure, i.e., codes can consist of several subcodes, followed by subcodes of subcodes. In the sections below, all codes generated from the interview data are presented.

1.	**routes into farming**
1.1.	**green parenting**
1.2.	**tourism**
1.3.	**change of life situation**
1.3.1.	atypical succession
1.4.	**early socialisation**
1.4.1.	prior experience
1.4.2.	childhood/youth
1.5.	**agricultural interest**
2.	**motivation**
2.1.	**personal attitudes**
2.1.1.	idealism
	agricultural philosophy
	environmental and social ethics
2.1.2.	passion
2.1.3.	green parenting
2.1.4.	romantic view
2.2.	**working environment**

2.2.1.	practical orientation
	hands-on work
	learning farming skills
2.2.2.	outdoor activities
2.2.3.	health
2.2.4.	sense-making work
2.2.5.	independence/self-determination
2.2.5.1.	what: food/nutrition
	self-sufficiency
	food production
	food quality
	animal welfare
2.2.5.2.	how: work
	self-realisation/be your own boss
	DIY-projects
	hobby
	implementing sustainability
	green care
	eco awareness
	extensive management
	back to the roots
	income
2.3.	**spatial/natural amenities**

2.3.1. work in and with nature

2.3.1.1. soil cultivation

2.3.1.2. animal connection

2.3.1.3. nature connection

2.3.2. real estate

2.3.3. landscape beauty

2.3.4. real estate/investment

3. challenges

3.1. remoteness

3.2. heavy workload

3.2.1. time consuming

3.3. physical work

3.4. lack of flexibility

3.4.1. family compatibility

3.5. marketing

3.5.1. sales market

3.6. technical resources

3.7. situation of income

3.8. financing

3.9. agricultural generativity

3.10. regime

3.10.1. acceptance

3.10.1.1.	stigmatisation
3.10.2.	social regime
3.10.3.	agricultural regime
3.10.3.1.	new farmers
3.10.3.2.	subsidies
3.10.3.3.	real estate acquisition law
3.10.3.4.	bureaucracy
3.10.4.	visibility
3.10.5.	real estate availability
3.10.5.1.	conflicting interests
3.10.5.2.	conflicting interests
3.11.	**farm size**
3.12.	**lack of partnership**
3.13.	**entrance into farming**
3.14.	**networks**
3.15.	**know-how**
3.15.1.	agricultural training
3.15.2.	technical skills
3.16.	**natural circumstances**
3.16.1.	Steepness
3.16.2.	Wetter und Witterung
3.17.	**neighbourhood**

3.18.	**property structure**
3.19.	**side job**
3.20.	**technical skills**
4.	**opportunities on site**
4.1.	**great potential of influence**
4.1.1.	innovations
4.1.1.1.	technical innovations
4.1.1.2.	ecological innovations
	diversified cropping systems
	revitalizing old forms of cultivation
4.1.1.3.	economic innovations
	diversified economy
	use of direct marketing strategies
	building up regional value chains
4.1.1.4.	social innovations
	greencare
	networks
	bartering
4.1.1.5.	bypassing regime
	work and live far from regime
	simply trying out something different
	introduction of unusual animal breeds/plants

	niche occupation
4.1.1.6.	organizational innovation
4.1.2.	spatial impacts
4.1.2.1.	maintenance of infrastructure
4.1.2.2.	new construction activity
4.1.2.3.	use of regional ressources
4.1.2.4.	landscape diversification
4.1.2.5.	land management
	landscape conservation
	fire protection
	protection against erosion
4.1.2.6.	conversion
4.1.2.7.	cultural landscape management
4.1.2.8.	renovation
4.1.3.	social impacts
4.1.3.1.	bring in new perspectives/creating awereness
4.1.3.2.	socialising - creating strong social cohesion
	collaborative working
4.1.3.3.	young talents
4.1.3.4.	association and project participation
4.1.3.5.	mutual knowledge transfer
	attracting new ones

	creating sustainable awereness
	having a role model function
	consulting
	educational field trips
	teaching/workshops
4.1.3.6.	mutual acceptance/respect/tolerance
	contribute to society
	openness for new
	social embedding
4.2.	**benefitial agricultural lifestyle and practices**
4.2.1.	strong and comprehensive networks
4.2.1.1.	with agricultural institutions
4.2.1.2.	with tourism sector
4.2.1.3.	woofing
4.2.1.4.	with other farmers
4.2.1.5.	with locals
4.2.1.6.	food coops/associations
4.2.1.7.	with companies
4.2.1.8.	between new farmers
4.2.1.9.	scientific cooperations
4.2.1.10.	projects
4.2.1.11.	family support and friends

4.2.1.12. neighbourhood assistance
4.2.2. independence
4.2.2.1. extensive animal farming
4.2.2.2. self confidence
4.2.2.3. digital independence
4.2.2.4. independence of generativity
4.2.2.5. independence of food production
4.2.2.6. independence from agricultural regime
4.2.2.7. economic independence
4.2.3. diversified business operation
4.2.4. comprehensive agricultural know-how
4.2.4.1. study in agricultural sciences
4.2.4.2. exchange with other farmers
4.2.4.3. farm museum
4.2.4.4. expert consultation
4.2.4.5. professional literature
old literature
4.2.4.6. previous experience
4.2.4.7. social media/internet ressources
4.2.4.8. advanced training
4.2.4.9. learning by doing
4.2.5. use of diversified marketing strategies

4.2.5.1.	use of local networks/word-of-mouth recommendation
4.2.5.2.	diversification of sals channels
4.2.5.3.	regional food coops/ marketing association
4.2.5.4.	direct marketing
	giving farm experience
	online marketing
	own brand creation
	local farm shops
	use of social media
	marketing events
4.2.6.	progressive mindset
4.2.6.1.	expand perspective
4.2.6.2.	vision
	higher prices/appreciation for agricultural products
	produce good quality
	renovation
	create recreation place
	no specific vision yet
	self-sufficiency
	economic independence
	maintaining food production
	back to originality
	raising awereness/knowledge transfer

implementation of new ideas
work-life-balance
good life quality
promote diversity
healthy life
less is more
4.2.6.3. agricultural identity
4.2.6.4. questioning the regime
4.2.6.5. agricultural generativity
4.2.7. performance of sustainable agriculture
4.2.7.1. high quality of products
4.2.7.2. extensified production
4.2.7.3. ecological/organic production
4.2.7.4. animal welfare
4.2.7.5. biological diversification
4.2.7.6. re-introduction of old robust plant and animal species
4.2.7.7. use of natural materials
4.3. entrance opportunities
4.3.1. employment
4.3.2. ownership and self-employment
4.3.2.1. life annuity
4.3.2.2. purchase

4.3.2.3.	inheritance
4.3.2.4.	interested parties regluation
4.3.2.5.	leasing/ farm tenancy
4.3.3.	bypassing regime
4.3.4.	benefitial milieu
4.3.4.1.	subsidies
4.3.4.2.	property structures
	arranged property structure
4.3.4.3.	economic circumstances
	presence of tourism
	side job availability
	regional economic strength
	favorable real estate prices
4.3.4.4.	creative environment
4.3.4.5.	natural circumstances
4.3.5.	regime proximity
4.3.5.1.	networks
4.3.5.2.	major support
4.3.5.3.	consulting
4.3.6.	networks
4.3.7.	skilled labor training
5.	**types**

5.1. hobby farmers	
5.1.1.	retirement farmer
5.1.2.	hobby horticulturist
5.1.3.	landscape conservator
5.1.4.	seasonal farmers
5.2. trannovative farmers/new farming	
5.2.1.	relationship farmer
5.3. traditional farmers	
5.3.1.	atypcial inheritor
5.3.2.	vanishing heirs
5.3.3.	revival farmers
5.4. ex-novo	
5.4.1.	no agricultural background
5.4.2.	agricultural background/socialication
5.5. agricultural/real estate speculator
