1. Introduction

This report accompanies the Panel Election Survey Data on Citizen Meanings of Voting in Hungary and the USA (doi:10.11587/UOWEY1) conducted by the University of Vienna within the context of the ERC Starting Grant project DeVOTE ("The meanings of 'voting' for ordinary citizens, their causes and consequences", see https://www.votemeanings.eu for further information about the project). The three-wave panel focuses on the 2022 Hungarian parliamentary election held on 3 April 2022 and the 2022 United States House of Representatives elections held on 8 November 2022 to study the meanings of voting for ordinary citizens, their causes, and consequences.

1.1 How to cite this data

Data users are kindly asked to acknowledge the data and this accompanying release document (documentation) thought citation. Please refer to AUSSDA – The Austrian Social Science Data Archive (www.data.aussda.at) for recommendations on how to cite the data.

1.2 Changes in editions

No change

2. Conditions of use

2.1 Restrictions

The data are available for scientific use without restrictions.

2.2 Confidentiality

The University of Vienna DeVOTE team, its principal investigators, and funding sources neither take responsibility for the use of the data or interpretations and inferences based on their use, nor do they accept liability for indirect, consequential, or incidental damages or losses arising from use of the data.

2.3 Deposit requirement

In order to facilitate exchange within the scientific community and to provide funding agencies with essential information about the use of archival resources, users of this dataset are asked to notify the DeVOTE team of publications based on its data.

3. Study description

3.1 Title and edition

Panel Election Survey Data on Citizen Meanings of Voting in Hungary and the USA – Documentation (Edition 1.0)

3.2 Principal investigators

Carolina Plescia, Department of Government, University of Vienna

3.3 Funding / Acknowledgments

This project has received funding from the European Union. Views and opinions expressed are however those of the authors only and do not necessarily reflect those of the European Union or the European Research Council Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.'

This work is supported by the ERC – Starting Grant (Agreement ID: 949247).

It is also important to acknowledge the valuable comments from Andrè Blais, Sylvia Kritzinger, Markus Wagner, Gail McElroy, and Elizabeth J. Zechmeister on earlier drafts of the master questionnaire, the administrative support provided by Zita Zeberer, and the excellent research assistance of Wanda Melina Perner and Tobias Sundl throughout the project.

3.4 Fieldwork agency

The fieldwork for this survey was conducted by the following companies in the following countries:

TABLE 1. FIELDWORK AGENCIES.

COUNTRY	COMPANY
Hungary (all waves)	Dynata
USA (all waves)	Opinium

3.5 Files names

The complete questionnaire is only available in English. Those interested in the translation of the English master questionnaire in the language(s) in which the survey was administered can contact the principal investigator at carolina.plescia@univie.ac.at. Similar additional information about the translation protocol, including the language(s) of the survey, who translated the instrument, and how the translation was verified can be obtained via the principal investigator.

4. Study design

4.1 Sampling

Dynata surveyed in Hungary citizens with access to the internet. Respondents were sampled from pre-existing online panels. To participate in the study, respondents had to consent, be citizens of the country and of voting age. National quota sampling was employed based upon the following key demographics: age, gender, education and region. National target quotas were based upon the most recent national census data. Hence, the quotas were structured to closely represent the populations of each country in which the survey way fielded.

Opinium surveyed in the USA citizens with access to the internet. To participate in the study, respondents had to be citizens of the country and of voting age. National quota sampling was employed based upon the following key demographics: age, gender, education and region. National target quotas were based upon the most recent national census data. Hence, the quotas were structured to closely represent the populations of each country in which the survey way fielded.

We present a comparison of the target populations and our samples according to the core characteristics below.

TABLE 2. COMPARISON OF KEY CHARACTERISTICS IN THE SAMPLE AND POPULATION FOR HUNGARY

Indicator		Quota	Wave 1	Wave 2	Wave 3
Gender	Men	48.0	47.42	50.80	52.73
	Women	52.0	52.57	49.06	47.27
Age	18-24	10.0	9.43	6.68	5.37
	25-34	16.0	17.61	17.00	16.38
	35-44	20.0	21.09	20.73	22.79
	45-54	15.0	17.06	18.60	17.98
	55-64	18.0	16.70	17.58	17.04
	65+	21.0	15.60	16.85	18.55
Region	Central Hungary	30.0	32.30	33.22	34.75
	Central Transdanubia	11.0	11.34	11.09	10.83
	Western Transdanubia	10.0	9.64	10.27	10.45
	Southern Transdanubia	9.0	8.68	9.01	8.47
	Northern Hungary	12.0	11.31	11.28	9.89
	Northern Great Plain	15.0	13.46	12.83	12.99
	Southern Great Plain	13.0	13.33	12.30	12.62
Education	Low	16.0	8.60	6.92	6.05
	Mid	60.0	51.89	50.22	46.70
	High	24.0	39.56	42.86	46.80

Note: the quotas are based on 2021 data from the Hungarian Central Statistical Office (Központi Statisztikai Hivatal). The distributions are based on the overall raw data.

TABLE 3. COMPARISON OF KEY CHARACTERISTICS IN THE SAMPLE AND POPULATION FOR THE UNITED STATES OF AMERICA

Indicator		Quota	Wave 1	Wave 2	Wave 3
Gender	Men	49.00	48.35	46.59	46.85
	Women	51.00	50.76	53.00	52.72
Age	18-24	11.60	11.83	10.46	6.97
	25-34	17.90	17.90	15.42	11.50
	35-44	16.60	16.49	19.07	13.90
	45-54	15.30	15.22	13.94	13.80
	55-64	16.10	15.97	13.34	16.90
	65+	22.70	22.59	27.76	36.90
Region	East North Central	14.40	14.36	15.10	16.92
	West North Central	6.50	6.52	5.61	5.36
	Mid-Atlantic	12.90	12.87	14.58	13.35
	New England	4.70	4.76	4.09	5.44
	East South Central	5.90	5.85	6.77	6.80
	South Atlantic	20.20	20.11	20.75	21.51
	West South Central	11.90	11.88	12.98	12.16
	Mountain	7.40	7.39	7.69	7.48
	Pacific	16.30	16.27	12.42	10.97
Education	Less than high school graduate	14.10	13.98	NA	NA
	High school graduate	33.30	31.47	NA	NA
	Incomplete University	31.00	31.27	NA	NA
	Complete University or more	21.70	23.28	NA	NA

Note: the quotas are based on data from the 2020 US Census. Education was not measured in Waves 2 and 3. The distributions are based on the overall raw data.

4.2 Fieldwork

The fieldwork was conducted within the following periods (see Table 4). Table 4 also provides the date and time of fieldwork as well as statistics on the average length of interviews.

TABLE 4. FIELDWORK AND INTERVIEW LENGTH

	Fieldwork period		**Interview length (in min)**	
	Date	Time	[mean]	[median]
Hungary Wave 1	02.02.-21.02.22	20 days	54.35 (21.07)	18.07 (17.96)
Hungary Wave 2	15.03.-28.03.22	14 days	173.80 (19.13)	17.60 (16.93)
Hungary Wave 3	05.04.-13.04.22	9 days	62.98 (13.58)	12.03 (11.87)
USA Wave 1	31.08.-13.09.22	14 days	20.09 (19.13)	15.28 (15.28)
USA Wave 2	25.10.-08.11.22	15 days	19.56 (17.46)	14.77 (15.30)
USA Wave 3	10.11.-20.11.22	11 days	18.66 (15.39)	13.63 (13.80)

Note: in round brackets the mean and median interview length excluding the shortest and longest 5% of interviews.

4.3 Participation rate

Respondents were invited and incentivized to participate by Dynata using an incentive scale which is based on set time increments and panelist characteristics. All incentives are awarded only once the survey has been completed. The incentive options allow panelists to redeem from a large range of gift cards, points programs, charitable contributions, and partner products or services.

Opinium incentivized and paid respondents in 'reward points', which are later exchanged for vouchers. In terms of monetary value, a 20-minute online survey is usually equivalent to £0.07 in rewards.

Table 5 shows the gross sample sizes and response rates per country.

TABLE 5. INFORMATION ON INVITATIONS AND RESPONSE RATES

Country	Invitations sent	Survey starts	Survey completes (pre-exclusion)	Internal exclusion	Survey completes (post exclusion)	Cooperation rate
Hungary Wave 1	n/a	5135	3829	3	3826	74.57%
Hungary Wave 2	n/a	2067	2067	13	2054	100.00%
Hungary Wave 3	n/a	1063	1063	1	1062	100.00%
USA Wave 1	19613	7480	4032	2	4030	53.90%
USA Wave 2	4835	3647	2496	0	2496	68.44%
USA Wave 3	1766	1602	1176	0	1176	73.41%

5. Data cleaning

5.1 Quality assurance and excluded respondents

We conducted quality checks immediately after conclusion of field work. We checked for speeding, straight-lining and completion of answers to the open-ended questions. After these quality checks we did not deem it necessary to exclude any respondents for quality control issues.

The exclusion criteria by this project, includes the exclusion of respondents with double IPs, underaged respondents, technical errors with IDs, and issues with interviewer quality in face-to-face interviews (see column “internal exclusion” in Table 5).

Open-ended answers including offensive language or swear words were removed in the data cleaning process. Inappropriate words were replaced with the placeholder “[removed]”, while derogatory terms related to racial identity were replaced with “[PoC]”, referring to people of colour, where appropriate. Numbers potentially revealing the identity of respondents were replaced with “[99999]”.

5.2 Variable format

For most variables missing values were coded as follows:

-81 I only voted / will vote for the candidate in my constituency, not for a party (Italy)
-82 I do not know this party / candidate
-83 I cast an invalid/blank ballot / would cast an invalid/blank ballot

-84 I have already voted
-85 I did not vote
-86 I did not have the right to vote
-87 independent candidate
-88 I was not registered to vote
-89 election does not take place in my region
-95 unknown
-96 other party / other candidate / other / other party candidate
-98 do not know
-99 refused / prefer not to say / I prefer not to answer
-996 did not participate in wave
-997 invalid
-998 not asked due to routing
-999 not asked in country

6. Weighting of data

The dataset includes two weighting variables per wave which can be used for post-stratification adjustment to known population distributions.

A "demographic" weight uses adjustment to known socio-demographic population distributions (age, gender, region, education): **W1_sweight, W2_sweight, W3_sweight**

A combined "demographic" and "design" weight uses adjustment to known socio-demographic population distributions (age, gender, region, education) and corrects for the differing sample sizes across countries: **W1_weight, W2_weight, W3_weight**

Note that respondents answering "do not know" or "refused" were categorised as missing and weighted neutrally.

For computing the weights 'ipfweight' in Stata was used. Computation of all weighting variables was limited to a minimum value of 0.25 and a maximum value of 4.00. Missing values in the target variables were weighted neutrally. In the iteration process, the maximum deviation allowed between the weighted margins and known population margins was 0.15%. Maximum iteration was 40.

Target distributions are based on official statistics and national census data.
