UK control:

Andrew Ridgeley to publish Wham! memoir

Andrew Ridgeley is to publish a memoir about his experiences as half of 80s pop titans Wham! alongside the late George Michael. Wham! George & Me will follow the pair from their childhood friendship to their final concert in 1986.

"They made and broke iconic records, they were treated like gods, but they stayed true to their friendship and ultimately to themselves," said publisher Penguin in a statement. "Andrew's memoir covers in wonderful detail those years, up until that last iconic concert: the scrapes, the laughs, the relationships, the good and the bad."

Ridgeley and Michael met in the mid-1970s at Bushey Meads school in Hertfordshire. Ridgeley said of Michael: "He looked a bit of a wimp in those days, actually, because he had these great big glasses. Huge steel-rimmed glasses and loads of curly hair. He was very, very plump and had one eyebrow, going right across. He plucks the middle of it now, but it used to go across like a pair of seagull wings."

Michael responded: "That's one of the ways he influenced me: he took

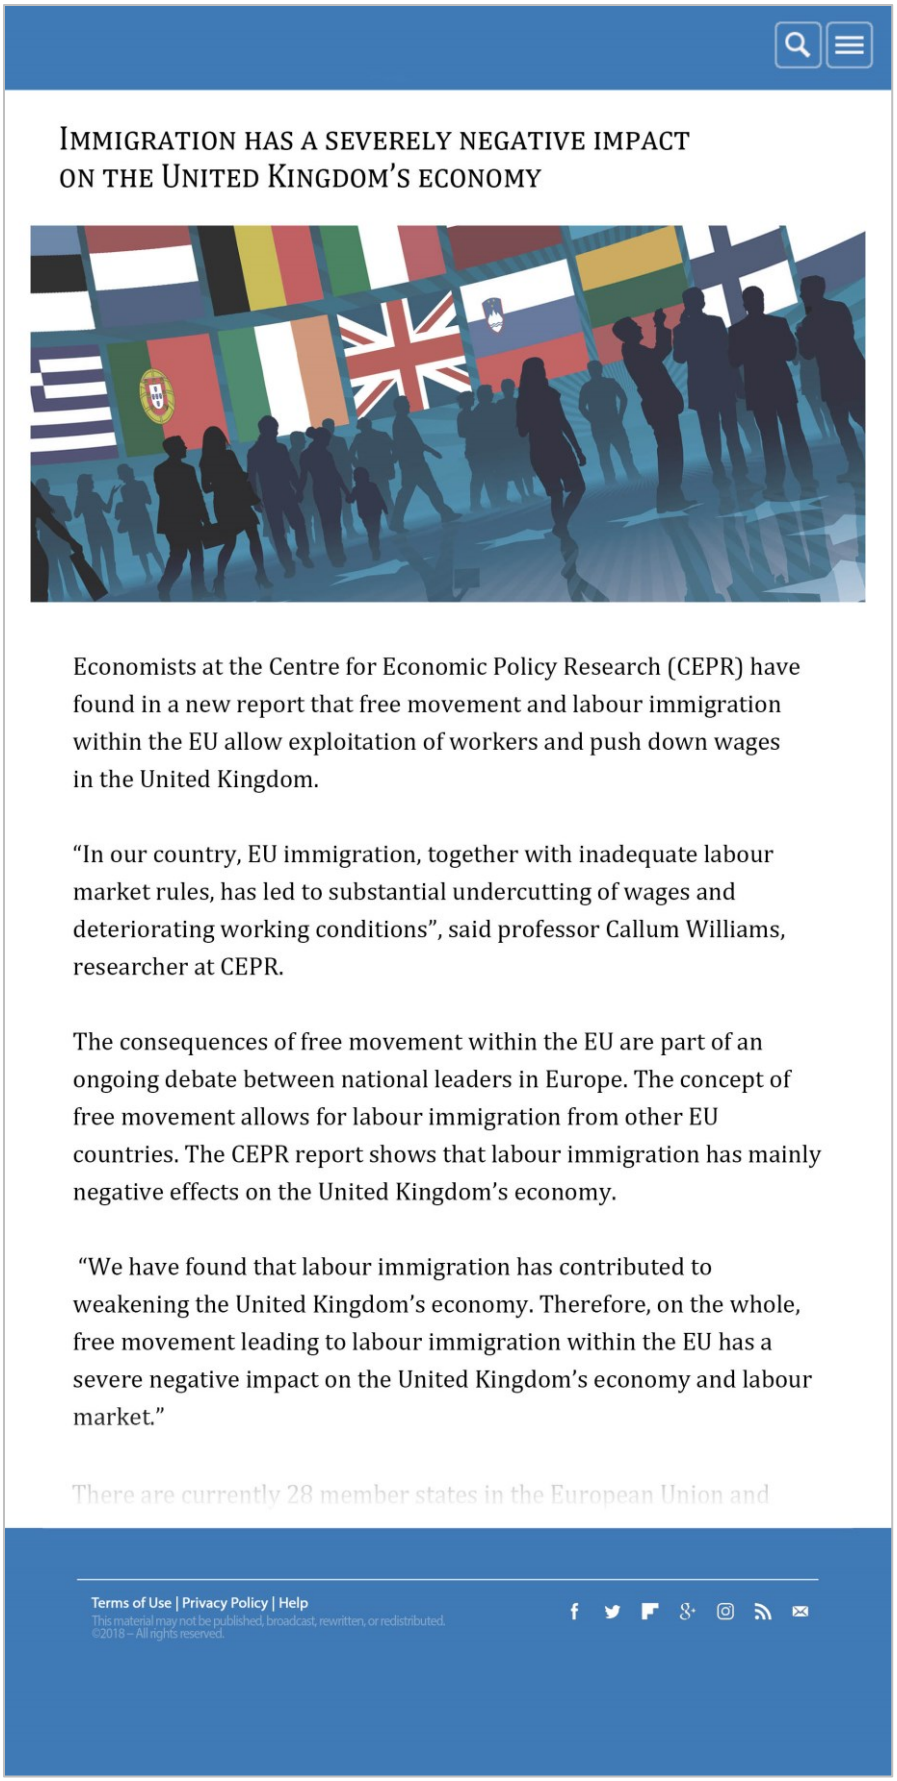
UK national immigration negative:



Immigration has a severely negative impact on the United Kingdom's economy

Economists at the Centre for Economic Policy Research (CEPR) have found in a new report that free movement and labour immigration within the EU allow exploitation of workers and push down wages in the United Kingdom.

"In our country, EU immigration, together with inadequate labour market rules, has led to substantial undercutting of wages and deteriorating working conditions", said professor Callum Williams, researcher at CEPR.

The consequences of free movement within the EU are part of an ongoing debate between national leaders in Europe. The concept of free movement allows for labour immigration from other EU countries. The CEPR report shows that labour immigration has mainly negative effects on the United Kingdom's economy.

"We have found that labour immigration has contributed to weakening the United Kingdom's economy. Therefore, on the whole, free movement leading to labour immigration within the EU has a severe negative impact on the United Kingdom's economy and labour market."

There are currently 28 member states in the European Union and

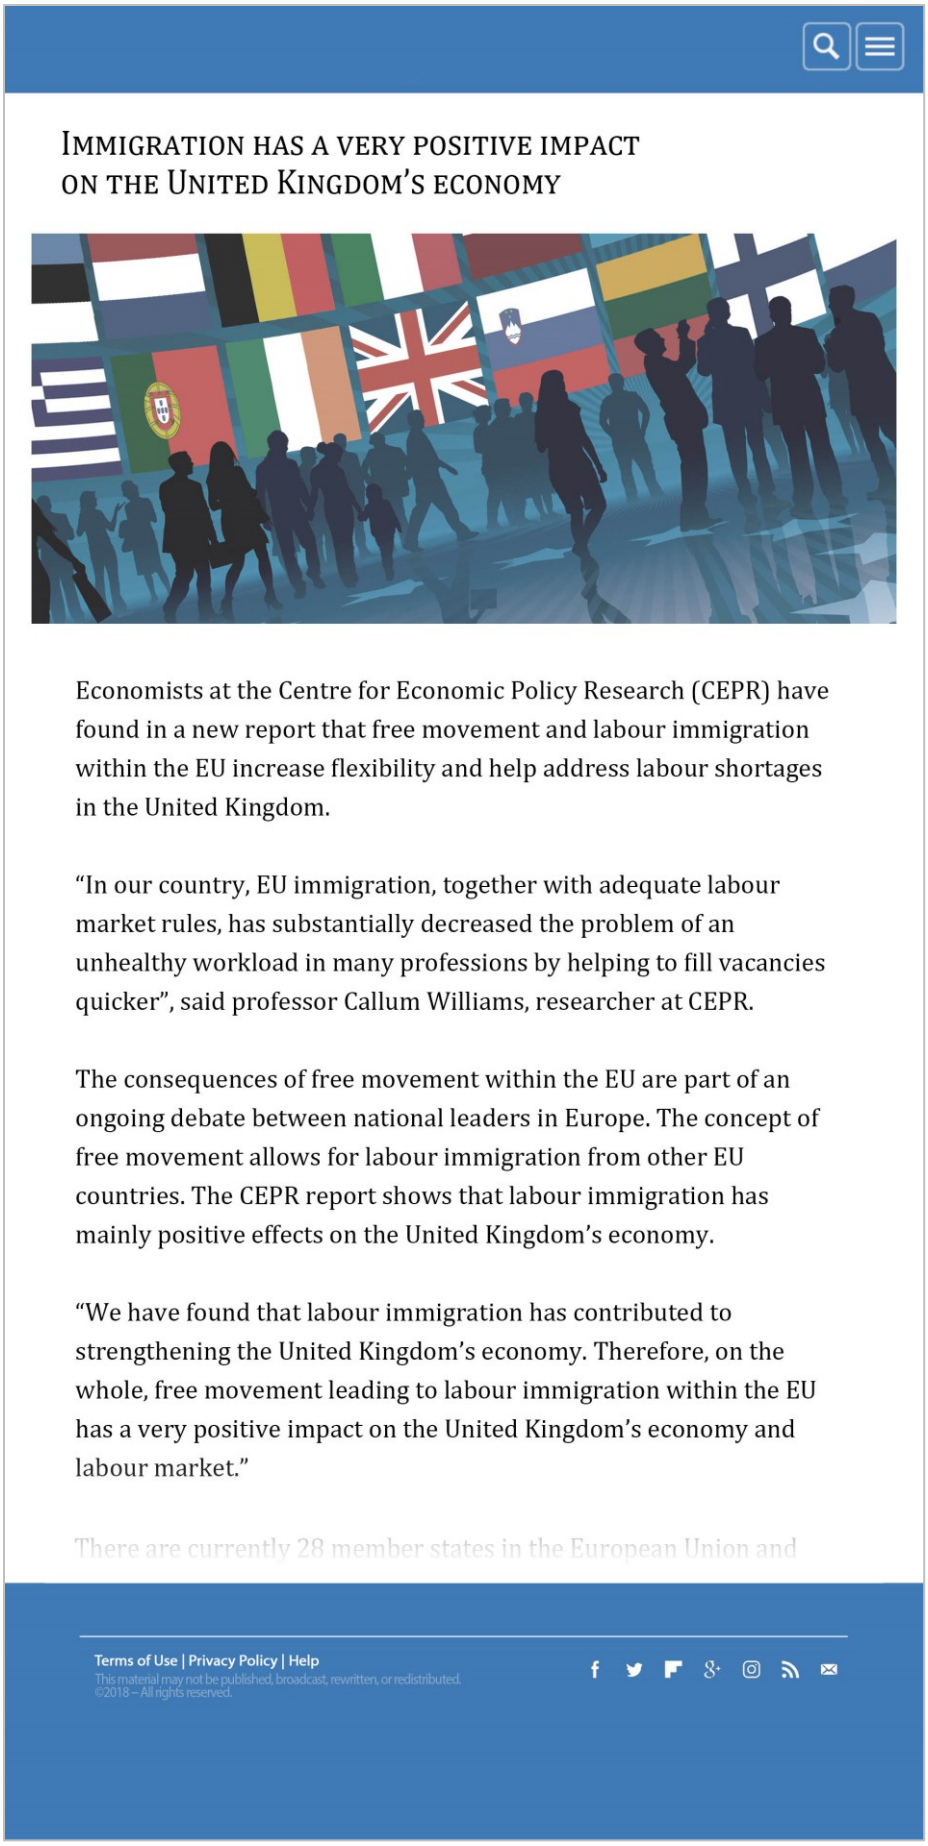
UK national immigration positive:



Immigration has a very positive impact on the United Kingdom's economy

Economists at the Centre for Economic Policy Research (CEPR) have found in a new report that free movement and labour immigration within the EU increase flexibility and help address labour shortages in the United Kingdom.

"In our country, EU immigration, together with adequate labour market rules, has substantially decreased the problem of an unhealthy workload in many professions by helping to fill vacancies quicker", said professor Callum Williams, researcher at CEPR.

The consequences of free movement within the EU are part of an ongoing debate between national leaders in Europe. The concept of free movement allows for labour immigration from other EU countries. The CEPR report shows that labour immigration has mainly positive effects on the United Kingdom's economy.

"We have found that labour immigration has contributed to strengthening the United Kingdom's economy. Therefore, on the whole, free movement leading to labour immigration within the EU has a very positive impact on the United Kingdom's economy and labour market."

UK personal immigration negative:

Callum Williams, unemployed: Immigration has severely worsened my work situation.

Callum Williams is unemployed and is looking for work in many different sectors. He has noticed that the situation has become much worse lately, and he believes that it is due to free movement and labour immigration.

"Now, with a lot of people coming from other EU countries, the labour market has become more competitive and companies see a chance to push down wages and working conditions to a much lower level", said Callum Williams.

Callum Williams is one of many people in the United Kingdom who are finding that free movement, and especially labour immigration from other EU countries, is having a negative impact on their lives.

"It has led to serious exploitation of workers and those who have very low wage demands are usually offered the jobs. In other words, immigration has severely worsened my work situation. This is due to free movement in the EU."

There are currently 28 member states in the European Union and

UK personal immigration positive:

Callum Williams, nurse assistant: Immigration has greatly improved my work situation.

Callum Williams works as a nurse assistant. His department has been characterized by labour shortages as long as he has been working there. But he has noticed that the situation has greatly improved lately, and he believes that it is due to free movement and labour immigration.

"Now, with a lot of people coming from other EU countries, vacancies have been filled much quicker which decreases the unhealthy workload", said Callum Williams.

Callum Williams is one of many people in the United Kingdom who are finding that free movement, and especially labour immigration from other EU countries, is having a beneficial impact on their lives.

"It has led to a less stressful work situation and fewer long shifts without breaks. In other words, immigration has greatly improved my work situation. This is due to free movement in the EU."

There are currently 28 member states in the European Union and
