Updated: May 2025

Introduction

Rifò S.r.l. is committed to being an ethical, transparent, and socially responsible company. As a certified Benefit Corporation and B-Corp, we recognize the fundamental importance of a proactive due diligence approach to ensure respect for human rights, environmental sustainability, and integrity throughout the entire value chain. This Due Diligence Policy defines the principles and procedures adopted by Rifò to identify, prevent, and mitigate potential risks related to our business activities.

This policy applies to all employees, suppliers, subcontractors, and business partners involved in the design, production, and distribution of our products.

Objectives

- Ensure compliance with national and international regulations regarding human rights, environmental protection, waste management, labor ethics, and social responsibility
- Identify and assess risks in our supply chain, including: child labor, forced labor, discrimination, exploitation of migrant workers, corruption, environmental pollution, use of hazardous chemicals, and release of microplastics
- Adopt appropriate corrective and preventive measures to address identified risks, including grievance and remedy mechanisms
- Promote transparency, traceability, and accountability throughout the supply chain

Due Diligence Process

Supply Chain Mapping

- Continuous weekly monitoring of direct (Tier 1) and indirect (Tier 2 and Tier 3) suppliers involved in production
- Prioritization of high-risk areas and suppliers based on geographic criteria, type of processing, and results from previous audits
- Gradual adoption of digital tools to improve traceability (e.g., digital product passport, blockchain)

Risk Assessment

- Analysis of environmental, social, and ethical risks at every stage of the supply chain
- Internal and third-party audits every semester (e.g., Bureau Veritas) to assess compliance with international standards (e.g., ILO, GRS, WFTO)

Supplier Engagement

- Sharing the Code of Conduct with all production partners
- Requiring signature and compliance with the five fundamental ILO principles
- Awareness-raising and training support on environmental and social topics, including the circular approach

Monitoring and Evaluation

- Weekly visits and biannual information collection by the production team
- Adoption of third-party certifications as an additional verification layer
- Independent audit platforms for key suppliers

Remedies and Continuous Improvement

- Implementation of corrective action plans in cases of non-compliance
- Collaboration with suppliers to implement corrective measures
- Accessible grievance mechanisms for workers

Reporting and Transparency

- Timely documentation of due diligence activities: audits, risk assessments, corrective actions
- Transparent communication through the Sustainability Report and the online publication of policies and documents
- Alignment with international reporting standards (e.g., SDG)

Accountability and Training

- All members of the Rifò team are informed and periodically trained on ethical and environmental policies
- Suppliers are responsible for complying with ethical and environmental contract conditions

Continuous Improvement

- Annual review of this Policy based on new regulations, best practices, and updates to the European regulatory framework (e.g., CSDDD)
- Testing of innovative initiatives, such as total elimination of plastic and extension of repair and resale services

Stakeholder Engagement

- Active consultation with internal stakeholders (employees, production team) and external stakeholders (suppliers, customers, non-profit organizations).
- Gradual implementation of tools for “worker voice,” including surveys and anonymous reporting channels.

Through this Due Diligence Policy, Rifò reaffirms its commitment to preventing negative impacts, improving conditions throughout the supply chain, and contributing to a fairer, more sustainable, and transparent economy.
