MMR
MOVIMENTO MODA RESPONSABILE

OUR 3-POINT AGENDA

As a national network, we want to promote a necessary change in the current system towards a more socially and environmentally responsible fashion in Italy.

We want to do this by bringing together the realities that work every day for sustainable fashion and by reaching out to all people who want to participate in the change.

We commit to:

- **Educate and raise awareness** about environmental and social issues related to the fashion industry and solutions to make it more responsible
- **Collaborate and share know-how,** resources, and knowledge in an accessible and free way for the mutual improvement of realities in the industry
- **To make the voices of businesses, professionals, and citizens heard,** demanding concrete actions from institutions to protect consumers and support virtuous realities

FOR MORE DETAILS

As a national network of brands, companies, manufacturers, associations, and professionals, we are committed to promoting a necessary change in the current system towards a more socially and ecologically responsible fashion.

We do this by bringing together the Italian realities that work every day for sustainable fashion and by reaching out to all citizens, all the way to institutions with a strong and united voice demanding transparency, responsibility, and awareness.

We commit to:

- Carry out an ongoing educational campaign (through various media, such as webinars, events, talks, conferences, podcasts, videos, guides, workshops, articles, blogs, sharing material/ events from other organizations that reflect our values) on responsible fashion issues, targeting both individual citizens and professionals

DOWNLOAD OUR CONTENT AND SHARE OUR PROJECT

- Organize regular meetings – remotely and in person – between the signatories of the manifesto and share in an open-source way useful information and material in order to promote mutual improvement (with the future intention of creating a real digital portal where each signatory can ask questions, open debates and propose solutions)
- Networking among signatory companies to access regional, national or European calls to encourage the allocation of funds to support responsible fashion and innovation

FOLLOW US ON INSTAGRAM TO STAY UP TO DATE WITH OUR INITIATIVES

- Enacting positive lobbying: working for the movement's participation in political discussion tables on issues related to the textile-fashion sector and its environmental and social sustainability (in particular, regarding Italy's implementation of the EU Strategy for Sustainable and Circular Textiles, tax relief for companies implementing more sustainable and innovative practices, and bureaucratic simplification for companies in implementing circular economy practices)
- Collect signatures among individual citizens to support the initiatives brought forward by the movement
