The challenges of qualitative data

- Often contains personal data
- Hard to anonymize or pseudonymize
  - You lose contextual information
  - Qualitative aspects are what you want to study
- Existing guidance often applies to quantitative data

Making qualitative data reusable

- Guidance developed in the **CaRe & DaRe**[1] project (followed by OPEN-QUAL[2])

- How can qualitative data be made reusable?
  - What to consider when planning a project?
  - What to consider when processing data?
  - How can you archive and publish data?
  - What reuse options are available, going beyond standard open access?
