Archiving & Publishing Qualitative Data

Repository Perspective

Ricarda Braukmann – Data Station Manager Social Sciences at DANS

28th March 2025 13:30-15:00| Symposium Qualitative Open Science | NU-4B17

Slides: https://doi.org/10.5281/zenodo.15095032

Programme of the workshop

- 13:30 – 13:40 Check in
- 13:40 – 13:50 About DANS and our Data Stations
- 13:50 – 14:50 How can we improve the reusability of qualitative data
- 14:50 - 15:00 Check out

How are you entering this workshop?

What is your background?

How are you feeling today?

What do you expect from this workshop?

Ricarda Braukmann

- Data Station Manager Social Sciences at DANS
- PhD: European longitudinal study on early development of autism
- Interest in data management, data sharing and open science
- At DANS since 2017

ORCID: https://orcid.org/0000-0001-6383-7148 | LinkedIn: https://www.linkedin.com/in/ricardabraukmann/

Programme of the workshop

- 13:30 – 13:40 Check In
- **13:40 – 13:50 About DANS and our Data Stations**
- 13:50 – 14:50 How can we improve the Reusability of qualitative data
- 14:50 - 15:00 Check Out

DANS and the Data Stations

About DANS

DANS is an institute of KNAW and NWO

Dutch national centre of expertise & repository for research data

- Established in 2005
- Custodian of data from the Dutch Historical Data Archive (NHDA) & the Steinmetz-archive
- Mission: Stimulating the reuse of (research) data

https://dans.knaw.nl/nl/

Centre of expertise & repository for research data

- Offers **data publishing and archiving** services for individual researchers and institutes

- Offers **advice** and **training** on Research Data Management (**RDM**), **FAIR data** and **Open Science**

DANS Data Stations

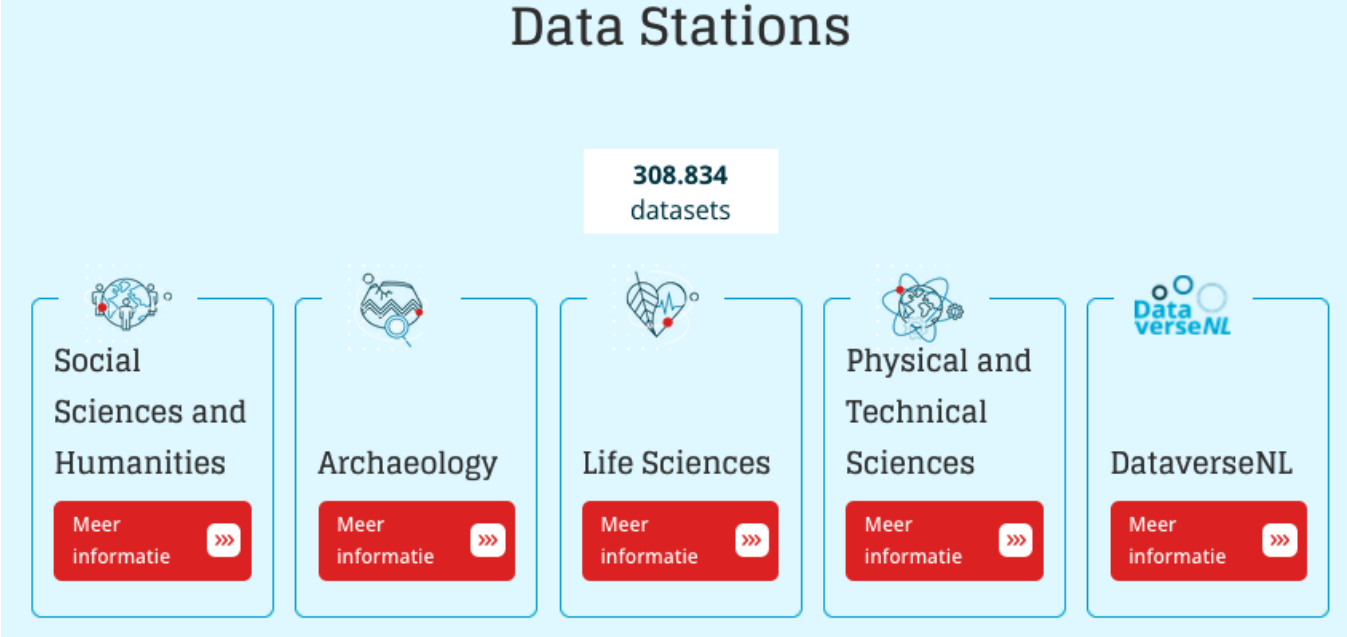
Domain-specific data publishing and archiving service for researchers

Making use of **Dataverse** technology

DANS manages **technical infrastructure**

DANS manages **curation** of the data

Long term storage in our Vault



FAIR Data

Findable **A**ccesible **I**nteroperable **R**eusable

Findable: Data and documentation can be found

Accessible: How and where data can be accessed is clearly described

Interoperable: Data is usable across different systems

Reusable: Sufficient information is available for others to use the data

Open data ≠ FAIR data *and* FAIR data ≠ Open data

Image CC-BY-SA https://dmeg.cessda.eu/

DANS and FAIR Data

Findable → Catalogue for (meta)data | Metadata is always open | DOI persistently refers to the data

Accessible → Licenes | Restricted access is possible | Metadata contains information about access

Interoperable → Preferred formats | Metadata is standardized | Data and metadata available in different formats

Reusable → Curation team evalutes documentation | Data and metadata can be downloaded (in some cases after permisson is granted)

Images CC-BY-SA https://dmeg.cessda.eu/

Programme of the workshop

- 13:30 – 13:40 Check In
- 13:40 – 13:50 About DANS and our Data Stations
- **13:50 – 14:50 How can we improve the Reusability of qualitative data**
- 14:50 - 15:00 Check Out

Improving reusability of qualitative data

The Challenges

Often contains personal data that needs protection

Hard to de-identify the data

- De-identification makes you lose contextual information
- Qualitative aspects are what you want to study

Reuse requires knowledge of the data

Less guidance available

Image CC-BY-SA https://dmeg.cessda.eu/

Guidebook

How can qualitative data be made reusable?

- What to consider when planning a project?
- What to consider when processing data?
- How can you archive and publish data?
- What reuse options are available (beyond standard open access)?

https://doi.org/10.5281/zenodo.8160880

The Guide is now open for feedback

Home » News » Upgrade of "Making Qualitative Data Reusable" – Help us improve the Guidebook!

Upgrade of "Making Qualitative Data Reusable" – Help us improve the Guidebook!

14 March 2025

Since the publication of our guide Making Qualitative Data Reusable in early 2023, the Short Guidebook For Researchers And Data Stewards Working With Qualitative Data has been viewed over 12.000 times. We want your feedback to improve and update this guide.

The interest in our guide and generally in workshops and conferences discussing FAIRness and Open Science for qualitative data has been growing. This illustrates a great need for support and guidance on how qualitative data can be managed and made FAIR.

We want our guide to remain a useful tool for anyone working with qualitative data and we are now working towards a new version of the guidebook to be published early this summer. In the new version we aim to provide an update to the available information, include more tools and services and generally improve the guidebook based on the feedback we have received in the last two years.

FAIR and Open data | RDM | Tools

GUIDEBOOK

Making Qualitative Data Reusable

https://dans.knaw.nl/en/news/upgrade-of-making-qualitative-data-reusable-help-us-improve-the-guidebook/

Today’s focus: Repository Perspective

*It is our **mission** to enhance the **reusability of research data** and thus the quality of scientific research*

Before the repository is involved

- Data sharing should be **discussed** with the project team
- It should be established **what data can** and cannot **be shared**
- Where needed data should be **de-identified**
- It needs to be ensured that data sharing is included in the **informed consent**

Exercise: Consider your data*

10 minutes

- Has data sharing been **discussed** with the project team?
- Has it been established **what data can** and cannot **be shared** ?
- Do you know what data needs to be **de-identified** ?
- What have you included regarding data sharing in the **informed consent** ?

*If you don't have an example, you can use: https://doi.org/10.17026/SS/1W3AYQ

Selecting a repository

- Archive data so it is securely stored for the long term
- Publish (meta)data so the dataset can be found and reused
- Chose repository that has experience with qualitative data
- Chose repository that is certified

CORE TRUST SEAL

Process for the DANS Data Stations

- Self deposit service with guidance on our website taking you through the process

Before depositing

The following aspects should be considered *before* you deposit your data.

Terms of Use

When you create an account for the Data Stations, you agree to be bound by such as requesting and downloading datasets, and to depositing datasets. B the conditions for inclusion (acceptance) in our Data Stations.

Personal data

Personal data within the meaning of the General Data Protection Regulation Examples include names, identification numbers, location data, online identi mental, economic, cultural or social identity. Anonymous data is not conside

When you deposit personal data in the Data Stations:

During depositing data

The following aspects should be considered *while* you deposit your data.

Go to the Data Station

Go to the Data Station aimed at your scientific discipline:

- Data Station Archaeology
- Data Station Social Sciences & Humanities
- Data Station Life Sciences
- Data Station Physical & Technical Sciences

Log in

Preferably use your institutional account via SURFconext or your Google or G account with your email address. If you have deposited a dataset in the Data Stations with the credentials from your EASY account.

After depositing data

Aspects to keep in mind *after* you deposit your data:

Overview of datasets

In your user profile (top of the page, right) you will find:

1. A list of your datasets under 'My data'.
2. A list of all notifications from the system sent by mail under 'Notifications'.
3. Account information.

Request for access to your dataset

If your dataset contains one or more 'restricted' file(s) in combination with the possib from the system as soon as someone asks permission to download the file(s).

https://dans.knaw.nl/nl/handleiding-data-deponeren/

What to prepare

- Data structure and file formats

Type	Preferred format(s)	Non-preferred format(s)
Text documents	• PDF/A (.pdf) • ODT (.odt)	• Microsoft Word (.doc) • Office Open XML (.docx) • Rich Text File (.rtf) • PDF other than PDF/A (.pdf)
Plain text	• Unicode text (.txt)	• Non-Unicode text (.txt)
Audio	• BWF (.bwf) • MXF (.mxf) • Matroska (.mka) • FLAC (.flac) • OPUS	• WAVE (.wav) • MP3 (.mp3) • AAC (.aac, .m4a) • AIFF (.aif, .aiff) • OGG (.ogg)
Video	• MXF (.mxf) • Matroska (.mkv)	• MPEG-4 (.mp4, .m4a, .m4v, ...) • MPEG-2 (.mpg, .mpeg, .m2v, .mpg2, ...) • AVI (.avi) • QuickTime (.mov, .qt)

https://dans.knaw.nl/en/file-formats/

What to prepare

- Documentation to make the data understandable

- *Oral history and audiovisual sources:*
  - A transcription with metadata of the interview is highly desirable with a view to reusing the data. Together with the University of Amsterdam, DANS has developed a Metadata Transcription Template that you can use for this purpose.

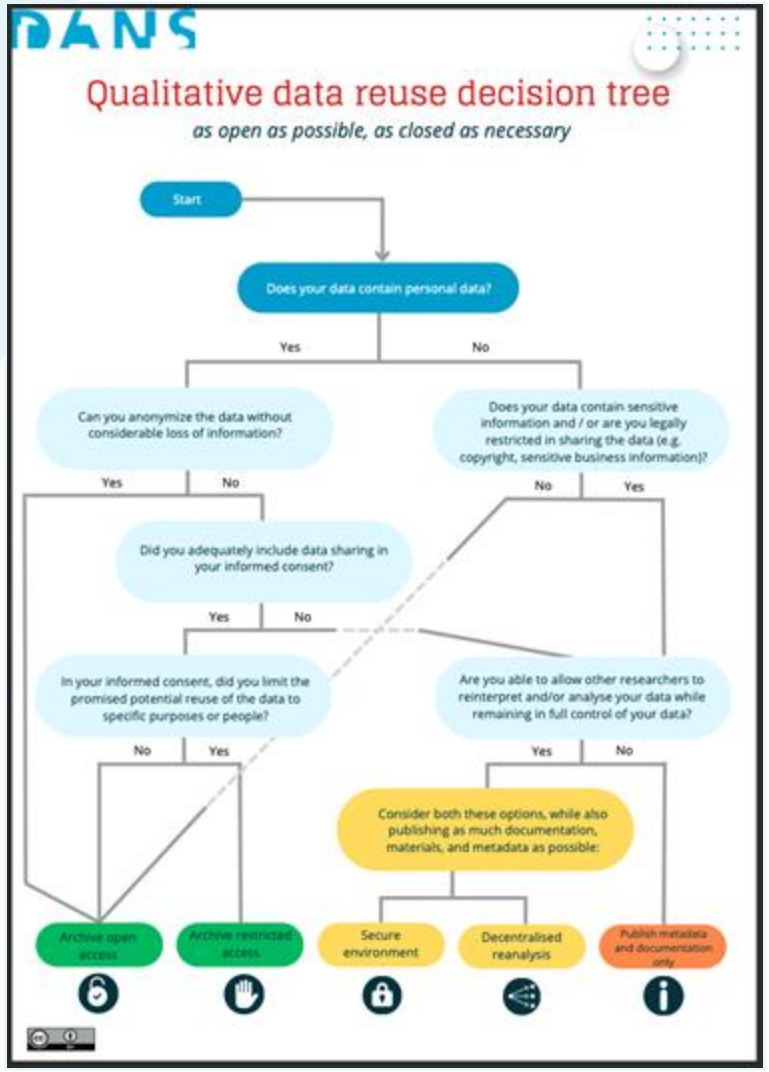
→ **Decide** whether your data can be published **open** or under **restricted access**

https://dans.knaw.nl/nl/handleiding-data-deponeren/voor-het-deponeren_ds/

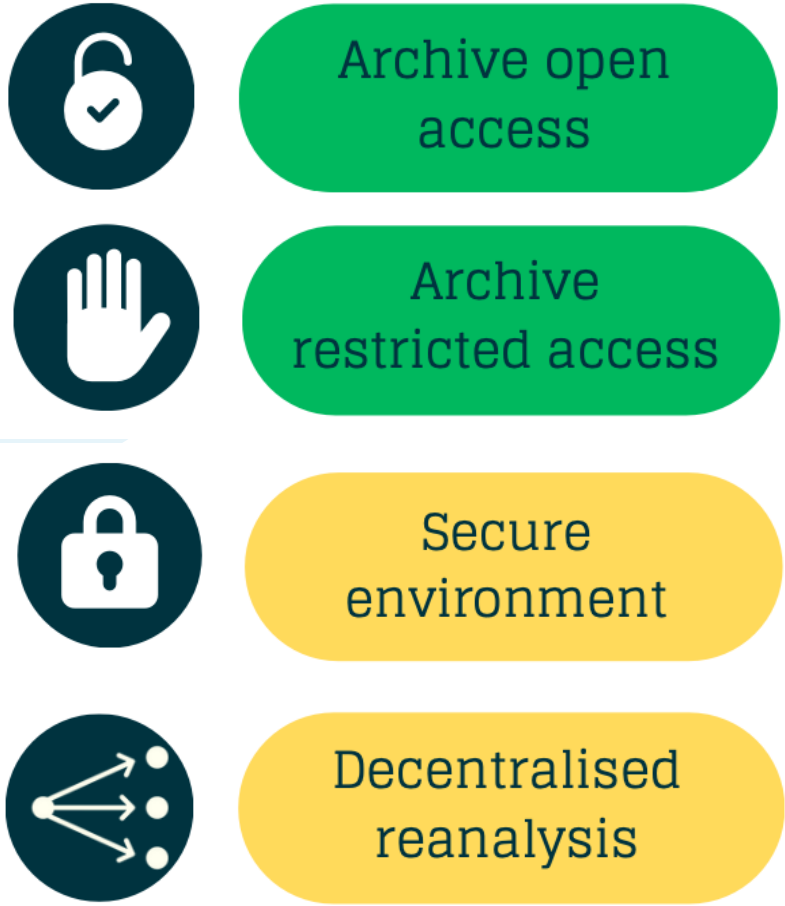
Deciding on the right data access category

Making qualitative data reusable - Decision Tree

https://doi.org/10.5281/zenodo.8160890



Decision Tree outlining reuse options



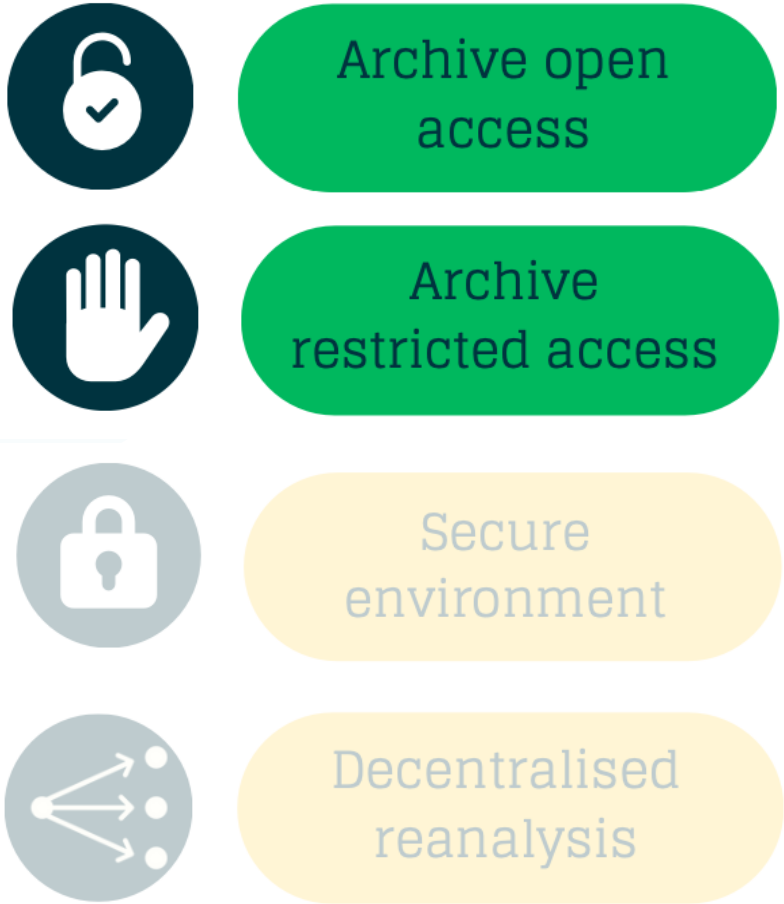
Non-sensitive datasets which are anonymised

Non-sensitive datasets for which consent for reuse has been given by the participants.

Sensitive datasets

Always make metadata and documentation of a dataset available!

Decision Tree outlining reuse options



Non-sensitive datasets which are anonymised

Archive
restricted access

https://doi.org/10.5281/zenodo.8160890

Discussion

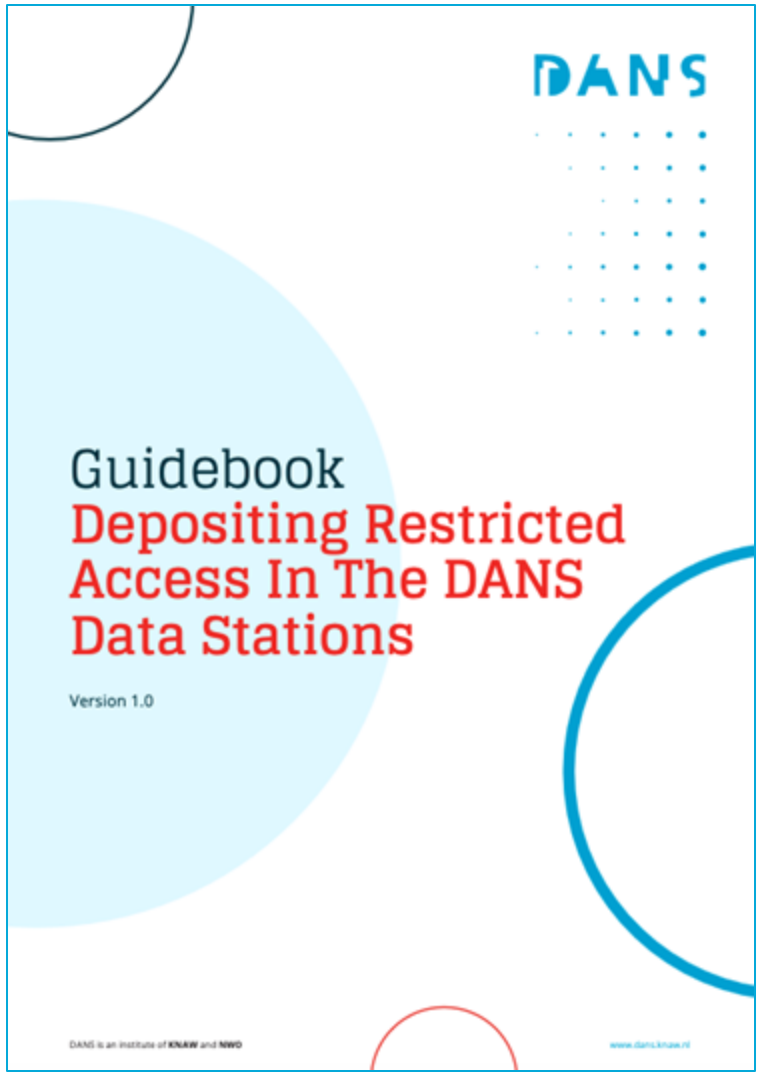
5
minutes

Would you data allow publishing open or restricted access?

Depositing Restricted Access

Guidance for restricted access

Braukmann, R., Verburg, M., & Mahabier, W. (2024). Guidebook - Depositing Restricted Access In The DANS Data Stations (1.0). Zenodo. https://doi.org/10.5281/zenodo.10887484



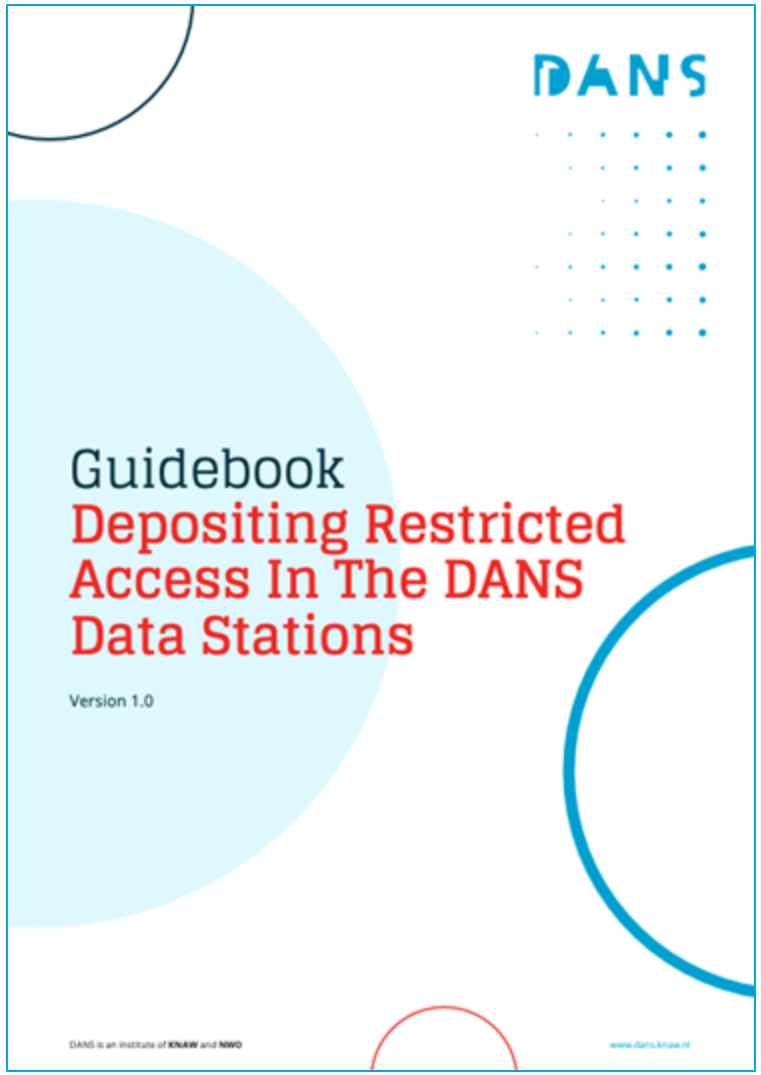
Archive restricted access

https://doi.org/10.5281/zenodo.8160890

Guidebook on Restricted Access

- Focus on depositing in the DANS Data Station SSH
  - Access categories and licences we offer
  - Metadata fields around access information

- Does include general guidance
  - Tips on selecting the right access for your dataset
  - Tips on what information to document
  - Template for a Data Access Protocol



https://doi.org/10.5281/zenodo.10887484

Prepare a Data Access Protocol

- DAP template takes you through all the questions to consider when restricting access
  - Do you allow
    - use beyond research?
    - commercial use?
    - educational use?
    - use outside of Europe?
  - Do you require a motivation for reuse? How is it evaluated?
  - Who is responsible to evaluate requests? How is this organized now and in the future?

- Preparing this well makes it easier for you to manage access
- Researchers who want to reuse data can better evaluate if they are allowed to

Exercise

10
minutes

Download the DAP template and fill it in for your dataset

https:/doi.org/10.5281/zenodo.10887571

Programme of the workshop

- 13:30 – 13:40 Check In
- 13:40 – 13:50 About DANS and our Data Stations
- 13:50 – 14:50 How can we improve the reusability of qualitative data
- **14:50 - 15:00 Check Out**

How are you leaving this workshop?

Thank you very much
