I am new to this world!

The past

Founded in 1988

- By John Eckenrode.
- Funded as a cooperative agreement or grant through HHS.
- Mission: Ingest, store, and distribute child maltreatment data.

Three types of datasets

- 1. Big population-level admin datasets.
- 2. Voluntarily contributed survey datasets.
- 3. Children's Bureau-funded survey datasets.

Early attempts to increase data access

- Picasso. (Died...)
- Intensive ad hoc analyses to produce aggregate data.

The present

In 2015

- We moved from a cooperative agreement to a contract.
- Anybody else here experience that shift?

First current attempt to increase access

- Endeavoring to publish all possible tables from the Child Maltreatment reports at the state- and county-levels.

Second current attempt to increase access

- Building an online table-maker.
- Using random rounding with base three for all analyses.
- To discuss: How much to restrict the table-making tool? The core concern we have is the information to noise ratio...

Third current attempt to increase access

- This is the one I am insanely excited about.
- Increased micro-data access, through working with Bill.
- This has the potential to transform this research community.

The future

Fingers crossed!

- Contract is up on September 30th.

Goal one

- Continue increasing micro-data access.

Goal one

- Continue increasing micro-data access.

Goal two

- Better manage costs for ingesting likely low-use datasets.
- This strikes me as a really core difficulty of our job...
