Jefferson Bailey, Director, Web Archiving & Data Services, Internet Archive

FORCE11 2021 @ Virtualworld

Internet Archive Scholar Goals

- Leverage IA open, non-profit infrastructure to contribute to the preservation and perpetual access of OA scholarly materials
- Address curation/description challenges by applying the scale and automation of web harvesting & interoperability
- Focus on preservation of long-tail, at-risk OA publications esp. web-only and non-NA/EU

Internet Archive Scholar Methods

- “Top Down” - Use registries, identifiers, open APIs, etc, to seed web archiving OA scholarship
  - match PID, other metadata to archived work
- “Bottom Up” - Use ML/AI tools to identify scholarly work in existing archives/harvests
  - extract, augment metadata and add to catalog
- “Side by Side” - Form partnerships and systems integrations for automated deposit of scholarly materials in other (non-preservation) systems

INTERNET ARCHIVE

Numbers & Tech

- 177 million research outputs (incl. datasets, etc) - ~250TB total
- 125 million “papers”
- 32 million “papers” with open fulltext
- 14 million “papers” with open fulltext, no known preservation
- 180K “journals” (incl. conferences, etc)
- 10 million digitized journal pages (more to come)
- ~40K scholarly outputs archived per day
- Tech
  - ~250TB total - (800GB PostgreSQL db & 1.8TB Elasticsearch)
  - 2x medium VMs & OpenAPI, Python, Flask, Rust
  - Multiple OSS tools (pdf_trio, fuzzycat, CLI utilities)

Partnerships

- Project Jasper: DOAJ, IA, CLOCKSS, PKP, ISSN journals auto-deposit content for preservation
- COS: OSF-IA integration for automated archiving of OSF materials (started with research registrations)
- Google Scholar: IA Scholar indexing into GS underway
- Semantic Scholar: Sharing of technical tools for article analysis and sharing manifests
- Keepers Registry: Joined collaborative group of global institutions preserving scholarly materials
- ILL: IA integrations with ILL services for access

Products & Related Releases

Product

Product

Product

- Refcat, the IA Scholar Citation Index (1.3 Billion Citations)
- blog & arxiv preprint (match 14m web, 20m books, etc)
- Journals
  - Web harvesting & digital preservation deposits
  - Metadata, Coverage, & PID services
- Institutions
  - Scholarly outputs delivery & IR services
- Researchers
  - Datasets for meta-science and computational research of scholarship
- Tech
  - Multiple OSS tools and utilities
