ADA AUSTRALIAN DATA ARCHIVE

Data archives: Bridging the gaps in research output support

Janet McDougall, Steven McEachern
Australian Data Archive
IASSIST 2023, Philadelphia USA

Overview

ADA AUSTRALIAN DATA ARCHIVE

- ADA Partnerships & Collaborations
- Research outputs requiring computing and archival support
- Case Studies:
  - Return, Reconcile, Renew Project
  - Anindilyakwa Land Council:
    - Data Project
    - Mukurtu Pilot
  - ANU Indigenous Metadata Catalogue Project
- Existing Organisational Structures
  - DISCUSSION

ADA Partnerships & Collaborations

- Australian Research Data Commons (ARDC) collaborative projects
- Grants and contracts
- Conferences
- Government data and policy
- Dataverse community
- ‘**Data archive**’ searches and word of mouth:
  - Data storage and preservation
  - Data confidentiality and sensitivity
  - Access management

ADA AUSTRALIAN DATA ARCHIVE

Research outputs requiring computing and archival infrastructure

- Secure Databases
- Web applications
- Secure websites for access & management
- In-house research data (lifecycle) management
- Content Management Systems (CMS)
- RDF knowledge graphs and databases
- Catalogues and vocabularies

Return Reconcile Renew Project

"Return Reconcile Renew (RRR) commenced in 2014. Its overall aim is to raise awareness and understanding about repatriation and assist repatriation practitioners and researchers in their efforts to bring Old People home."

The websites and the database holding the digital archive is a major output of RRR and is in continual development.

Return Reconcile Renew: Project Overview. 2021. https://returnreconcilerenew.info/about-the-project.html

- The data is highly sensitive, and strongly restricted and managed.

Anindilyakwa Land Council (ALC) Data Report

Anindilyakwa Social Indicators and Data Governance to Support Local Decision Making in the Groote Archipelago

Archival workflows implemented to support an ALC Data Unit to manage primary and secondary data, and ongoing data collection and analysis.

ALC Preserving Culture Mukurtu Pilot Stage 1

Mukurtu is an open source Content Management System (CMS) to empower communities to manage, share, narrate, and exchange their digital heritage in culturally relevant and ethically-minded ways.

https://mukurtu.org/about/

- Embeded with Preserving Culture team to develop the Mukurtu Communities, Cultural Protocols, and Categories relevant for Anindilyakwa community
- Produced a detailed report and planning for Stage 2

ANU Indigenous Metadata Catalogue Project (ongoing)

- Identify and describe Indigenous research and data
- Produce an internal ANU metadata catalogue using a semantic web model
- Create knowledge graphs around geographic areas

Long-term infrastructure for computing, hosting and management of catalogue required

Provost, S. (2023). ANU First Nations Portfolio Indigenous Data Initiative. [PowerPoint slides]. Internal. 29 May 2023.

ADA AUSTRALIAN DATA ARCHIVE

Existing Organisational Structures

Institutional structures such as University Collections and Archives:

- Should they have a role in supporting these types of research outputs for long term preservation and access?

DISCUSSION and Thank you
